

Rosemount™ 3051S Series of Instrumentation

Innovation reaching across your operation

With the Rosemount 3051S Series of Instrumentation, operations can be optimized in these critical areas: production, quality, energy efficiency, and safety and environment. By leveraging the power of the scalable Rosemount 3051S across the entire operation, you'll be able to minimize process variability, gain greater process insight, reduce maintenance and downtime, and meet regulatory demands. What's more, it's easy to use, ensuring the full potential of the measurement investment is realized.

Overview

Rosemount 3051S SuperModule™ Platform

The most advanced pressure, flow, and level measurements

- The all-welded hermetic SST design delivers the industry's highest field reliability.
- Ultra performance provides up to $\pm 0.025\%$ accuracy and 200:1 rangedown.
- Ultra for Flow performance provides up to $\pm 0.04\%$ of reading and 14:1 flow turn-down.
- 15-year stability and 15-year limited warranty
- SIL3 Capable: IEC 61508 certified by an accredited 3rd party agency for use in safety instrumented systems up to SIL 3 (minimum requirement of single use [1oo1] for SIL 2 and redundant use [1oo2] for SIL 3).
- IEC 61508 Functional Safety Specifications for 3051S are detailed at Emerson.com/Rosemount/Safety.

Rosemount 3051S Series selection guide

Rosemount 3051S Coplanar™ Differential, Gage, or Absolute Transmitter

Ordering information: [Table 1](#)

- Coplanar platform enables integrated manifold, primary element, and seal system solutions.
- Dual-capacitance Saturn™ sensor technology corrects for overpressure and line pressure effects.
- Calibrated spans from 0.1 inH₂O to 4000 psi (0,25 mbar to 276 bar).
- Available with 316L SST, Alloy C-276, Alloy 400, Tantalum, gold-plated Alloy 400, or gold-plated 316L SST process isolators

Rosemount 3051S In-line Gage or Absolute Transmitter

Ordering information: [Table 2](#)

- Direct threaded connection, manifold or seal system solutions
- Piezoresistive sensor technology allows calibrated spans from 0.3 to 10000 psi (20,7 mbar to 689 bar).
- Available with 316L SST or Alloy C-276 process isolators

Rosemount 3051S MultiVariable™ Transmitter

Ordering information: [Table 3](#)

- Combines Differential Pressure, Static Pressure, and Process Temperature measurements along with Mass and Energy Flow in a single device.
- Compensates for 25+ different variables providing accurate and repeatable flow readings.
- Customize pressure and temperature compensation for any flow application.
- Easily configure flow and device parameters with Engineering Assistant Software.

Rosemount 3051SF DP Flow Meters

Ordering information: [Table 4](#)

- Integrates the Rosemount 3051S with Rosemount's industry leading primary elements to create one complete flow meter assembly.
- Fully assembled, configured and leak tested for out-of-the-box installation.
- Reduce installed costs by replacing ten parts traditionally used for a DP Flow installation with one flow meter.
- Reduce straight pipe requirements, lower permanent pressure loss, and achieve accurate measurement in small line sizes.

Rosemount 3051S Electronic Remote Sensor (ERS™) System

Rosemount 3051SAM Transmitter Ordering information: [Table 7](#)

Rosemount 3051SAL Transmitter Ordering information: [Table 8](#)

- The industry's first digital DP Level architecture consists of a single 4–20 mA HART® loop with two Rosemount 3051S pressure sensors connected electronically.
- Unique digital architecture enables stable and repeatable DP Level measurements on tall vessels, towers, and applications with wide-varying temperatures.
- Achieve increased process insight and diagnostics with multivariable measurements including DP, pressure, and scaled variable for tank level or volume.
- Simplify installations and maintenance by eliminating wet or dry legs, heat tracing, and purge systems.

Rosemount 3051S Level Transmitter

Ordering information: [Table 9](#)

- Level transmitters combine world-class Rosemount 3051S Pressure Transmitters with direct mount seals, all in a single integrated model number.
- Connect to virtually any process with a comprehensive offering of seal types, sizes, fill fluids, and diaphragm materials.
- Combine with an Rosemount 1199 Remote Mount Seal to form a Tuned-System™ Assembly for a cost effective, easy-to-install DP Level measurement solution.

Advanced functionality

WirelessHART® (IEC 62591) capabilities

The following functionality is available on coplanar, in-line, multivariable, DP flow meters and level transmitters:

- Quickly deploy new pressure, level and flow measurements in 70 percent less time.
- Eliminate wiring design and construction complexities to lower costs by 40–60 percent.
- Reduce pipe penetrations and impulse piping with industry-leading multivariable technology.
- Extended range antenna capabilities provide access to remote locations.
- Delivering over a decade of maintenance free performance with 15-year stability and 10-year power module life.

Advanced diagnostic capabilities

The following functionality is available on coplanar, in-line, DP flow meters and level transmitters:

- Provides diagnostic coverage from the process to the transmitter to the host.
- Prevent on-scale failures by diagnosing electrical loop issues with loop integrity diagnostics.
- Process intelligence detects abnormal process conditions enabling more productive and safer operations.
- Monitor for solids build-up or freezing in the process connection with the plugged impulse line diagnostic.
- Extend diagnostic coverage to Safety Instrumented Systems with IEC 61508 SIL 2/3 capable rating.

Remote display and interface

The following functionality is available on coplanar, in-line, DP flow meters, Electronic Remote Sensors, and level transmitters:

- Direct mount to the process and access transmitter capabilities and diagnostics at grade.
- Get access up to 100 feet (30 m) away from the process to ensure personnel safety.
- Eliminate the need for impulse lines for best practice installations.

Rosemount instrument manifolds

Available on traditional, coplanar, and in-line transmitters:

- Designed and engineered to provide optimal performance with Rosemount 3051S Transmitters.
- Reduce cost and leak points with flangeless coplanar design.
- Fully integrated manifold and transmitter assemblies come fully leak checked, calibrated and assembled allowing for one purchase order to save time and cost.
- Rosemount manifolds provide a wide variety of styles, materials, and configurations to fit any process.

Rosemount™ 3051S Coplanar™ Pressure Transmitter

Rosemount 3051S Coplanar Pressure Transmitters are the industry leader for Differential, Gage, and Absolute pressure measurement. The coplanar platform allows seamless integration with manifolds, primary elements, and seal solutions. Capabilities include:

- Ultra, ultra for flow, and classic performance
- 4–20 mA HART®, WirelessHART®, FOUNDATION™ Fieldbus protocols
- Safety Certification (Option code QT)
- Advanced diagnostics (Option code DA2)
- Remote display and interface (Option code M7, M8, or M9)

Additional information: [Specifications](#), [Rosemount 3051S/3051Sfx/3051S-ERS](#), [Dimensional drawings](#)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Table 1: Rosemount 3051S Scalable™ Coplanar Pressure Transmitter Ordering Information

Model	Transmitter type			
3051S	Scalable pressure transmitter			
Performance class⁽¹⁾				
1	Ultra: 0.025% span accuracy, 200:1 rangedown, 15-yr stability, 15-yr limited warranty			★

Z3	Anaerobic PTFE paste	★
Typical model number: 3051S1CD 2A 2 E12 A 1A DA2 B4 M5		

(1) For details, see [Specifications](#).

(2) This option is only available with range codes 2A and 3A, 316L SST or Alloy C-276 isolating diaphragm and silicone fill fluid.

(3) Performance Class code 3 is available with Measurement Type code D only.

(4) 3051S_CD0 is only available with SST traditional flange, 316L SST diaphragm material, and Bolting option L4.

(5) Materials of Construction comply with metallurgical requirements highlighted within NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.

(6) Tantalum diaphragm material is only available for ranges 2A–5A, differential and gage.

(7) “Assemble to” items are specified separately and require a completed model number. Process connection option codes B12, C11, D11, EA2, EA3, and EA5 are only available on differential Measurement Type, code D.

(8) Consult an Emerson™ representative for performance specifications.

(9) Not available with Performance Class code 3.

(10) Requires Plantweb housing.

(11) Only intrinsically safe approval codes apply.

(12) Only available with output code X.

(13) Available with output code A only. Available approvals are FM Intrinsically Safe; Nonincendive (option code I5), CSA Intrinsically Safe (option code I6), ATEX Intrinsic Safety (option code I1), or IECEx Intrinsic Safety (option code I7). Contact an Emerson representative for additional information.

(14) Long-Life Power Module must be shipped separately, order Power Module 701PBKFF.

- (15) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (16) Requires Plantweb housing and output code A. Includes Hardware Adjustments as standard.
- (17) For process connection option code A11, the mounting bracket must be ordered as part of the manifold model number.
- (18) Not available with output code F.
- (19) Not available with output code X.
- (20) Not available with housing style codes 00, 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
- (21) Not available with process connection option code A11.
- (22) Requires Plantweb housing and Hardware Adjustments option code D1. Limited availability depending on transmitter type and range. Contact an Emerson representative for additional information.
- (23) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD, IA, IB, IE, IF, IG, KG, T1, K2, N3, EM, and KM.
- (24) Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of standard carbon steel conduit plug.
- (25) Valid when SuperModule Platform and housing have equivalent approvals.
- (26) Not available with M20 or G½ conduit entry size.
- (27) Only available on differential and gage measurement types. Silicone fill fluid is standard.
- (28) Bolts are not considered process wetted. In instances where NACE MR0175/ISO 15156 and NACE MR0103 conformance is required for bolting, L7 is the recommended bolting option.
- (29) Not available with Housing code 7J.
- (30) Not available with output code F, option code DA2, or option code QT.
- (31) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (32) P1 is not available with 3051S_CA0.
- (33) When assembled to remote diaphragm seal system using B11 or B12 process connections, the maximum working pressure of the system may be limited by the rating of the Rosemount 1199 Seal System selected.
- (34) Requires 316L SST, Alloy C-276, or Gold-plated 316L SST diaphragm material, assemble to Rosemount 305 integral manifold or DIN-compliant traditional flange process connection, and bolting option L8. Limited to Pressure Range (Differential), ranges 2A – 5A.
- (35) Not available with output code F or X. Not available with housing code 7J.
- (36) Not available with Housing code 00, 5A, 5J, or 7J.
- (37) The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, IE, IF, IG, and KG.
- (38) Requires 316L SST diaphragm material, glass-filled PTFE O-ring (standard), and Process Connection code E12 or F12.
- (39) Not available with Housing code 00, 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009. Suitable for use with all IS approvals (I1, I2, I3, I5, I6, I7, IA, IB, IE, IF, IG, IP, IM, KG).
- (40) NACE compliant wetted materials are identified by footnote ⁽⁵⁾.

Rosemount™ 3051S In-line Pressure Transmitter

Rosemount 3051S In-line Pressure Transmitters are the industry leader for Gage and Absolute pressure measurement. The in-line, compact design allows the transmitter to be connected directly to a process for quick, easy and cost effective installation. Capabilities include:

- Ultra and Classic Performance
- 4–20 mA HART®, WirelessHART®, FOUNDATION™ Fieldbus protocols
- Safety certification (Option code QT)
- Advanced diagnostics (Option code DA2)
- Remote display and Interface (Option code M7, M8, or M9)

Additional information: [Specifications](#), [Rosemount 3051S/3051SFx/3051S-ERS](#), [Dimensional drawings](#)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information .

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051S1TG 2A 2 E11 A 1A DA2 B4 M5		

- (1) For details, see [Specifications](#).
- (2) Materials of Construction comply with metallurgical requirements highlighted within NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.
- (3) Isolator diaphragm selection will dictate materials of construction for wetted parts.
- (4) "Assemble to" items are specified separately and require a completed model number.
- (5) Consult an Emerson representative for performance specifications.
- (6) Requires Plantweb housing.
- (7) Only intrinsically safe approval codes apply.
- (8) Only available with output code X.
- (9) Only available with output code A. Available approvals are FM Intrinsically Safe; Nonincendive (option code I5), CSA Intrinsically Safe (option code I6), ATEX Intrinsic Safety (option code I1), or IECEx Intrinsic Safety (option code I7). Contact an Emerson representative for additional information.
- (10) Long-Life Power Module must be shipped separately, order Power Module 701PBKKF.
- (11) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (12) Requires Plantweb housing and output code A. Includes Hardware Adjustments as standard.
- (13) Not available with output code F.
- (14) Not available with output code X.
- (15) Not available with housing style codes 00, 01, 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
- (16) Requires Plantweb housing and Hardware Adjustments option code D1. Limited availability depending on transmitter type and range. Contact an Emerson representative for additional information.
- (17) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD, IA, IB, IE, IF, IG, KG, T1, K2, N3, EM, and KM.
- (18) Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of standard carbon steel conduit plug.
- (19) Valid when SuperModule Platform and housing have equivalent approvals.
- (20) Not available with M20 or G½ conduit entry size.
- (21) Silicone fill fluid is standard.
- (22) Not available with Housing code 7J.
- (23) Not available with output code F, option code DA2, or option code QT.
- (24) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (25) Not available with process connection option code A11.
- (26) Not available with output code F or X. Not available with housing code 7J.
- (27) Not available with Housing code 00, 5A, 5J, or 7J.
- (28) The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, IE, IF, IG, and KG.
- (29) Requires 316L SST diaphragm material and Process Connection code E11 or G11.
- (30) Not available with Housing code 00, 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009. Suitable for use with all IS approvals (I1, I2, I3, I5, I6, I7, IA, IB, IE, IF, IG, IP, IM, KG).
- (31) NACE compliant wetted materials are identified by footnote ⁽²⁾.

Rosemount 3051S MultiVariable Transmitter

The Rosemount™ 3051S MultiVariable™ Transmitter delivers unprecedented performance and capabilities by providing superior flow calculations including fully compensated mass or volume, energy, and totalized flow. Specify the level of compensation that best matches the application:

- Gas, natural gas, and steam measurement: Utilize full compensation (differential pressure, line pressure, and temperature measurement)
- Saturated steam: Utilize differential and line pressure, or differential pressure and temperature measurement
- Liquids: Utilize differential pressure and temperature measurement
- Liquids at stable temperatures: Utilize differential pressure measurement
- 4–20 mA HART®, WirelessHART®, FOUNDATION™ Fieldbus protocols

Additional information: [Specifications](#), [Rosemount 3051SMV/3051SFx](#), [Dimensional drawings](#)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SMV 3 M 1 2 G 4 R 2 E12 A 1A B4 C2 M5		

- (1) For details, see [Specifications](#).
- (2) For Measurement Types 1 and 2, only available with DP range codes 2, 3, and 4, 316L SST and Alloy C-276 isolating diaphragm and silicone fill fluid. For Measurements Types 3 and 4, only available with DP range codes 2 and 3, 316L SST and Alloy C-276 isolating diaphragm and silicone fill fluid.
- (3) Only available with Transmitter output code A.
- (4) If ordering measurement type code M, DP Range 4 and 5 are not available.
- (5) DP Range 0 is only available with Measurement Type 3 or 4 and traditional flange, 316L SST diaphragm material, and Bolting option L4.
- (6) DP Range 4 and 5 is only available with SP range N or 4 and Alloy C-276 diaphragm material.
- (7) Required for Measurement Type codes 3 and 4.
- (8) For Measurement Type codes 1 and 2 with DP range 1, absolute limits are 0.5 to 2000 psi (0,03 to 137,9 bar) and gage limits are -14.2 to 2000 psig (-0,98 to 137,9 bar).
- (9) Required for Measurement Type codes 2 and 4.
- (10) Required for Measurement Type codes 1 and 3. RTD Sensor must be ordered separately.
- (11) Materials of Construction comply with metallurgical requirements highlighted within NACE® MR0175/ISO 15156 for sour oil field production environments Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.
- (12) Tantalum diaphragm material is only available for DP ranges 2-5.
- (13) "Assemble to" items are specified separately and require a completed model number.
- (14) Consult an Emerson™ representative for performance specifications.
- (15) Only available with Measurement Type 2 and multivariable type P.
- (16) Transmitter output code F is not available with Performance Class 1 and 2 and Measurement Type 3 and 4.
- (17) Only available with output code X.
- (18) Long-Life Power Module must be shipped separately, order Power Module 701PBKKF.
- (19) For process connection option code A11, the mounting bracket must be ordered as part of the manifold model number.

- (20) Not available with transmitter output code F.
- (21) Not available with transmitter output code X.
- (22) Not available with process connection option code A11.
- (23) This assembly is included with certification options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD, EM, KM, IA, IE, IF, IG, KG.
- (24) Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of standard carbon steel conduit plug.
- (25) FISCO is only available with transmitter output code F.
- (26) Not available with M20 or G½ conduit entry size.
- (27) RTD cable not available with this option.
- (28) Requires 316L SST diaphragm material, glass-filled PTFE O-ring (standard), and Process Connection code E12 or F12.
- (29) Silicone fill fluid is standard.
- (30) Bolts are not considered process wetted. In instances where NACE MR0175/ISO 15156 and NACE MR0103 conformance is required for bolting, L7 is the recommended bolting option.
- (31) Not available with DP range 0.
- (32) Only available with Measurement Type codes 3 and 4.
- (33) When assembled to remote diaphragm seal system using B11 or B12 process connections, the maximum working pressure of the system may be limited by the rating of the Rosemount 1199 Seal System selected.
- (34) Requires 316L SST or Alloy C-276 diaphragm material, assemble to Rosemount 305 Integral Manifold or DIN-compliant traditional flange process connection, and bolting option L8. Limited to differential pressure ranges 2-5.
- (35) Not available with output code F or X.
- (36) The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, IE, IF, IG, and KG.
- (37) Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive approval (option code I5), install in accordance with Rosemount drawing 03151-1009.
- (38) NACE compliant wetted materials are identified by footnote ⁽¹⁾.

Rosemount™ 3051SF DP Flow Meters

Rosemount 3051SF Flow Meters integrate the Rosemount 3051S with industry leading primary elements. Capabilities include:

- Flow meters are factory configured to meet your application needs (Configuration Data Sheet required)
- Multivariable capabilities allow scalable flow compensation (Measurement Types 1–4)
- 4–20 mA HART®, WirelessHART®, and FOUNDATION™ Fieldbus protocols
- Ultra for Flow for improved flow performance across wider flow ranges
- Integral temperature measurement (Option code T)
- Advanced diagnostics (Option code DA2)
- Direct or remote mount configurations available

Additional information: [Specifications](#), [Rosemount 3051S/3051SFx/3051S-ERS](#), [Dimensional drawings](#)

Rosemount 3051SFA Annubar Flow Meter

- Annubar flow meters reduce permanent pressure loss by creating less blockage in the pipe
- Ideal for large line size installations when cost, size and weight of the flow meter are concerns

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

For additional technical data and ordering information for Rosemount Annubar Primary Elements, refer to the Rosemount DP Flow meters and Primary Elements [Product Data Sheet](#).

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SFA D L 060 D C H P S 2 T1 0 0 0 3 2A A 1A 3				

- (1) For option code A: 4–20mA HART only.
- (2) See the Rosemount DP flow meters and Primary Elements Product Data Sheet for Pipe I.D. table.
- (3) Provide the “A” dimension for Flanged, Flange-Lok, and Threaded Flo-Tap models. Provide the “B” dimension for Flange Flo-Tap models.
- (4) Available in remote mount applications only.
- (5) The cage nipple is constructed of 304SST.
- (6) Temperature Measurement Option code T or R is required for Measurement Type codes 1, 3, 5, and 7.
- (7) Required for Measurement Type codes 2, 4, 6, and D.
- (8) Required for Measurement Type codes 3, 4, 7, and D.
- (9) For Measurement Type codes 1, 2, 5, and 6 with DP range 1, absolute limits are 0.5 to 2000 psi (0,03 to 137,9 bar) and gage limits are -14.2 to 2000 psig (-0,98 to 137,9 bar).
- (10) Transmitter output code F is only available with Measurement type code 1, 2, 5, 6, and D.
- (11) Only intrinsically safe approval codes apply.
- (12) Only available with Measurement Types D and 6.
- (13) Only available with output code X.
- (14) Only available with output code A.
- (15) For details, see [Specifications](#).
- (16) Only available with differential pressure ranges 2 and 3, and silicone fill fluid.
- (17) Long-life Power Module must be shipped separately, order Power Module 701PBKKF.
- (18) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (19) Applies to assembled flow meter only, mounting not tested.
- (20) Instrument connections for remote mount options and isolation valves for Flo-tap models are not included in the material traceability certification.
- (21) Not available with transmitter connection platform 6.
- (22) Materials of construction comply with metallurgical requirements within NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.
- (23) FISCO is only available with Transmitter output code F.
- (24) Not available with M20 or G½ conduit entry size.
- (25) Not available with transmitter output code F with Measurement Types 1, 2, 5, or 6.

- (26) Not available with housing code 7J.
 (27) Not available with output code X. Only available with Measurement Type D.
 (28) Not available with output code F, option code DA2, or option code QT.
 (29) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
 (30) Not available with Housing code 5A, 5J, or 7J. External ground screw assembly (option code D4) is included with the T1 option. The T1 option is not needed with FISCO Product Certifications.
 (31) Includes Hardware Adjustments (option code D1) as standard. Not available with output code X or F. Only available with Measurement Type D.
 (32) -58 °F (50 °C) for Measurement Type 1-7.
 (33) Not available with output code F.
 (34) Not available with housing codes 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
 (35) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD, IA, IE, N3, T1, EM, and KM.
 (36) Not available with Housing code 5A, 5J, or 7J. Available with intrinsically Safe approvals only. For FM intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009.

Rosemount 3051SFC Compact Flow Meter

- Compact conditioning flow meters reduce straight piping requirements to 2D upstream and 2D downstream from most flow disturbances
- Simple installation of compact flow meters between any existing raised-face flanges

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

For additional technical data and ordering information for Rosemount Annubar Primary Elements, refer to the Rosemount DP Flow meters and Primary Elements [Product Data Sheet](#).

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SFC 1 C S 060 N 065 T 3 2 J A 1A 3				

(1) For option code A: 4–20 mA HART only.

(2) Available with primary element technology P only.

(3) For the 10-in. (250 mm) and 12-in. (300 mm) line sizes, the alignment ring must be ordered (Installation Accessories).

- (4) 10-in. (250 mm) and 12-in. (300 mm) line sizes not available with primary element technology code A.
- (5) For 2-in. (50 mm) line size the beta ratio is 0.6 for primary element technology code C.
- (6) Only available with Measurement Type codes 1, 3, 5, 7.
- (7) Required for Measurement Type codes 2, 4, 6, and D.
- (8) Required for Measurement Type codes 3, 4, 7, and D.
- (9) For Measurement Type codes 1, 2, 5, and 6 with DP range 1, absolute limits are 0.5 to 2000 psi (0,03 to 137,9 bar) and gage limits are -14.2 to 2000 psig (-0,98 to 137,9 bar).
- (10) Requires Plantweb housing.
- (11) Transmitter output code F is only available with Measurement type code 1, 2, 5, 6, and D.
- (12) Only intrinsically safe approval codes apply.
- (13) Only available with Measurement Types D and 6.
- (14) Only available with output code X.
- (15) Available with output code A only.
- (16) For details, see [Specifications](#).
- (17) Only available with differential pressure ranges 2 and 3, and silicone fill fluid.
- (18) Long-life Power Module must be shipped separately, order Power Module 701PBKKF.
- (19) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (20) Only required for 10-in. (250 mm) and 12-in. (300mm) line sizes.
- (21) Available with primary element technology code C only.
- (22) Available with primary element technology codes C or A only.
- (23) For Annubar Option A, consult factory for pipe schedules other than Sch. 40.
- (24) Available with primary element technology C or P only.
- (25) Not available with output codes F or X.
- (26) Not available with housing code 7J.
- (27) Materials of Construction comply with metallurgical requirements within NACE MR0175/ISO for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.
- (28) FISCO is only available with Transmitter output code F.
- (29) Not available with M20 or G½ conduit entry size.
- (30) Not available with transmitter output code F with Measurement Types 1, 2, 5, or 6.
- (31) Not available with output code X. Only available with Measurement Type D.
- (32) Not available with output code F, option code DA2, or option code QT.
- (33) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (34) Not available with Housing code 00, 5A, 5J, or 7J. External ground screw assembly (option code D4) is included with the T1 option. The T1 option is not needed with FISCO Product Certifications.
- (35) Includes Hardware Adjustments (option code D1) as standard. Not available with output code X or F. Only available with Measurement Type D.
- (36) Not available with Output Protocol code F.
- (37) -58 °F (50 °C) for Measurement Type 1-7.
- (38) Not available with housing codes 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
- (39) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, K7, E3, KA, KC, KD, IA, T1, EM, and KM.
- (40) Not available with Housing code 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009.

Rosemount 3051SFP Integral Orifice Flow Meter

- Precision honed pipe section for increased accuracy in small line sizes
- Self-centering plate design prevents alignment errors that magnify measurement inaccuracies in small line sizes

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

For additional technical data and ordering information for Rosemount Annubar Primary Elements, refer to the Rosemount DP Flow meters and Primary Elements [Product Data Sheet](#).

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

GE	M12, 4-pin, male connector (eurofast)	•	•	
GM	A size mini, 4-pin, male connector (minifast)	•	•	
Typical model number: 3051SFP 1 S 010 W3 S 0150 D3 1 J A 1A 3 M5				

- (1) For option code A: 4–20 mA HART only.
- (2) To improve pipe perpendicularity for gasket sealing, socket diameter is smaller than standard pipe O.D.
- (3) Required for measurement type codes 3, 4, 7, and D.
- (4) For Measurement Type codes 1, 2, 5, and 6 with DP range 1, absolute limits are 0.5 to 2000 psi (0,03 to 137,9 bar) and gage limits are –14.2 to 2000 psig (–0,98 to 137,9 bar).
- (5) Transmitter output code F is only available with Measurement type code 1, 2, 5, 6, and D.
- (6) Only intrinsically safe approval codes apply.
- (7) Only available with measurement types D and 6.
- (8) Only available with output code X.
- (9) Only available with output code A.
- (10) For details, see [Specifications](#).
- (11) Only available with differential pressure ranges 2 and 3, and silicone fill fluid.
- (12) Long-life Power Module must be shipped separately, order Power Module 701PBKKF.
- (13) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (14) Not available with 1½-in. (38 mm) line size.
- (15) Thermowell material is the same as the body material.
- (16) Does not apply to process connection codes T1 and S1.
- (17) Not available for bore sizes 0010, 0014, 0020, or 0034.
- (18) Not available with DIN process connection codes D1, D2, or D3.
- (19) Materials of Construction comply with metallurgical requirements within NACE MR0175/ISO for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments.
- (20) Not available with output codes F or X.
- (21) Not available with housing code 7J.
- (22) FISCO is only available with Transmitter output code F.
- (23) Not available with M20 or G½ conduit entry size.
- (24) Not available with transmitter output code F with Measurement Types 1, 2, 5, or 6.
- (25) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (26) Not available with output code F, option code DA2, or option code QT.
- (27) Not available with housing code 5A, 5J, or 7J. The T1 option is not needed with FISCO Product Certifications.
- (28) Includes hardware adjustments (option code D1) as standard. Not available with output code X or F. Only available with measurement type D.
- (29) Not available with output code F.
- (30) –58 °F (50 °C) for Measurement Type 1-7.
- (31) Not available with output code X. Only available with measurement type D.
- (32) Not available with housing codes 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
- (33) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, K7, E3, KA, KC, KD, IA, T1, EM, and KM.
- (34) Not available with Housing code 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009.

Rosemount™ 3051S Electronic Remote Sensor (ERS)™ System

The Rosemount 3051S ERS System is a flexible, 2-wire 4-20 mA HART® architecture that calculates differential pressure (DP) electronically using two pressure sensors that are linked together with a non-proprietary electrical wire.

Ideal applications for the Rosemount 3051S ERS System include tall vessels and distillation columns that have traditionally required long lengths of capillary or impulse piping. When used in these types of applications, the Rosemount 3051S ERS System can deliver:

- More accurate and repeatable DP measurements
- Faster time response
- Simplified installations
- Reduced maintenance

How to order

1. Choose two Rosemount 3051S ERS Transmitter models. These may be any combination of Rosemount 3051SAM and Rosemount 3051SAL models.

Example: Rosemount 3051SAM

Coplanar

In-line

Example: Rosemount 3051SAL

Coplanar

In-line

- Decide which model will be the ERS Primary (4–20 mA loop termination and optional LCD display) and which will be the ERS Secondary. This will be specified by the “Configuration Type” code in each model number.

Example:

- A. Secondary
- B. Primary

- Specify two full model numbers per the desired configuration.

Example:

3051SAL1PG4AA1A1020DFF71DA00M5

3051SAM1ST2A2E11A2A

Rosemount™ 3051SAM Transmitter for ERS™ Applications

- Coplanar and in-line sensor module platforms
- Variety of process connections including threaded NPT, flanges, manifolds, and Rosemount 1199 Remote Seals
- Available with 15-year stability and 15-year limited warranty

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SAM 1 ST 2A 2 E11 A 2A		

- (1) See “Specifications” section for more detail. See “[Specifications](#)” section for more detail. The Rosemount 3051S ERS System offers three performance class options; classic, ultra, and enhanced ERS system performance. The classic and ultra performance classes are suited to lower static pressure and stable temperature conditions. The enhanced ERS system performance class provides better performance across temperature (–40 to 185 °F) with improved performance at higher static pressure.
- (2) The pressure range should be specified based on the maximum static pressure, not differential pressure.
- (3) Materials of construction comply with metallurgical requirements highlighted within NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.
- (4) Not available with pressure sensor/module codes T or E.
- (5) Tantalum diaphragm material is only available with Pressure Sensor/Module code G.
- (6) “Assemble to” items are specified separately and require a completed model number.
- (7) Consult an Emerson representative for performance specifications.
- (8) Maximum cable distance for SIS installations. See Rosemount 3051S ERS [Reference Manual](#) for more information.
- (9) Maximum cable distance for IS (Intrinsically safe) installations. Other options may not be valid at longer distances.
- (10) Not available with Configuration Type code S.

- (11) Not available with Process Connection code A11.
- (12) This assembly is included with options E1, N1, K1, ND, E4, E7, N7, K7, E2, KA, KC, KD, K2, T1, EP, and KP.
- (13) Not available with M20 or G½ conduit entry size.
- (14) The QZ report quantifies the performance of the entire ERS system. One report is provided per ERS system. The QZ option is specified on the primary transmitter (configuration type code P).
- (15) Not available with configuration type code S.
- (16) Silicone fill fluid is standard.
- (17) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.

Rosemount™ 3051SAL Transmitter for ERS™ Applications

- Integrated transmitter and direct mount seal in a single model number
- Variety of process connections including flanged, threaded, and hygienic remote seals
- Available with 15-year limited warranty

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information .

A Rosemount 3051SAL Scalable ERS Level Transmitter consists of three parts. First, specify the transmitter model codes found in [Table 8](#) . Then, specify a direct mount seal found here: [Diaphragm seals for Rosemount 3051SAL](#). Finish the model number by specifying all desired options from the "Options" section of [Table 8](#).

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SAL 1 P G 4A A 1A 1 0 20 D FF 7 1 DA 0 0 M5		

- (1) See "Specifications" section for more detail. The Rosemount 3051S ERS System offer three performance class options; classic, ultra, and enhanced ERS system performance. The classic and ultra performance classes are suited to lower static pressure and stable temperature conditions. The enhanced ERS system performance class provides better performance across temperature (-40 to 185 °F) with improved performance at higher static pressure.
- (2) Not suitable for vacuum applications.
- (3) See "Seal system type in Rosemount DP Level [Product Data Sheet](#) for more detail.
- (4) Maximum working pressure (MWP) of the Thermal Optimizer is 4000 psi (275 bar).
- (5) Maximum working pressure (MWP) of the thermal range expander is 3750 psi (258,6 bar).
- (6) Thermal range expander with SYL THERM XLT secondary fill fluid is not recommended for use in vacuum applications below 6 psia (400 mbar-a).
- (7) At ambient pressure of 14.7 psia (1 bar-a) and ambient temperature of 70 °F (21 °C). Temperature limits are reduced in vacuum service and may be limited by seal selection.
- (8) Due to heat transfer to the transmitter, the maximum process temperature of the transmitter will be de-rated if ambient or process temperatures exceed 185 °F (85 °C). Consult Instrument Toolkit to verify the application.
- (9) For complete process and ambient temperature limits, see thermal range expander temperature operating range.
- (10) This is a food grade fill fluid.
- (11) Not suitable for vacuum applications.
- (12) Only available with Thermal Range Expander.
- (13) The pressure range should be specified based on the maximum static pressure, not differential pressure.
- (14) Maximum cable distance for SIS installations. See "Safety Instrumented Systems (SIS) Certification" section of Rosemount 3051S ERS [Reference Manual](#) for more information.
- (15) Maximum cable distance for IS (Intrinsically safe) installations. Other options may not be valid at longer distances.
- (16) Not available with configuration type code S.
- (17) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, KA, KC, KD, K2, T1, E3, EM, KM.
- (18) Not available with M20 or G½ conduit entry size.
- (19) Silicone fill fluid is standard.
- (20) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (21) The QZ report quantifies the performance of the entire ERS system. One report is provided per ERS system. The QZ option is specified on the primary transmitter (configuration type code P).
- (22) Materials of construction comply with metallurgical requirements highlighted within NACE MR 0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR 0103 for sour refining environments.

Rosemount™ 3051S Scalable™ Level Transmitter

Rosemount 3051S Scalable Level Transmitters combine the features and benefits of a high-performance Rosemount 3051S with the durability and reliability of diaphragm seals all in a single model number.

Rosemount 3051SAL In-line with “FF” Flanged Seal

Rosemount 3051SAL Coplanar™ with “SS” Hygienic Tank Spud Seal

Rosemount 3051SAL Tuned-System™ Assembly with Thermal Range Expander

Rosemount 3051SAL Balanced System

Product features and capabilities include:

- Variety of process connections including flanged, threaded, and hygienic seals
- Quantified performance for the entire transmitter/seal assembly (QZ option)
- HART®, FOUNDATION™ Fieldbus, and wireless protocols

Additional information: [Specifications](#), [Rosemount 3051S/3051SFx/3051S-ERS](#), [Dimensional drawings](#)

Rosemount 3051SAL Scalable Level Transmitter

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information.

A Rosemount 3051SAL Transmitter consists of three parts. First, specify the transmitter model codes found in [Table 9](#). Then, specify a direct mount seal found here: [Diaphragm seals for Rosemount 3051SAL](#). Finish the model number by specifying all desired options from the "Options" section of [Table 9](#).

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Typical model number: 3051SAL 1 C G 2A A 1A 10 20 D FF G 1 DA 0 0		

- (1) For details, see [Specifications](#). The Rosemount 3051S ERS System offers three performance class options; Classic, Ultra, and Enhanced ERS System Performance. The Classic and Ultra performance classes are suited to lower static pressure and stable temperature conditions. The Enhanced ERS System Performance class provides better performance across temperature (–40 to 185 °F) with improved performance at higher static pressure.
- (2) Requires Plantweb housing.
- (3) Only intrinsically safe approval codes apply.
- (4) Only available with output code X.
- (5) Available with output code A only. Available approvals are FM Intrinsically Safe; Nonincendive (option code I5), CSA Intrinsically Safe (option code I6), ATEX Intrinsic Safety (option code I1), or IECEx Intrinsic Safety (option code I7). Contact an Emerson Process Management representative for additional information.
- (6) Low side seal identical to high side seal.
- (7) Maximum working pressure is 4000 psi (275 bar).
- (8) Maximum working pressure (MWP) of the Thermal Range Expander is 3750 psi (258,6 bar).
- (9) Requires separate Rosemount 1199 model number to be selected. With option code 1, user must select Seal Location Option code M (low side of transmitter) in the Rosemount 1199 Remote Mount Seal System Model.
- (10) Not suitable for vacuum applications.
- (11) PVC coating should not be exposed to temperatures above 212 °F (100 °C) to avoid possibility of thermal breakdown.
- (12) Capillary length applies to both high and low side for balanced systems. Applies to low side only for tuned-system assemblies. Applies to high side only for remote mount single seal systems with capillary.
- (13) At ambient pressure of 14.7 psia (1 bar-a) and ambient temperature of 70 °F (21 °C). Temperature limits are reduced in vacuum service and may be limited by seal selection.
- (14) Due to heat transfer to the transmitter, the maximum process temperature of the transmitter will be de-rated if ambient or process temperatures exceed 185 °F (85 °C). Consult Instrument Toolkit to verify the application.
- (15) For complete process and ambient temperature limits, see [Thermal Range Expander temperature operating range](#).
- (16) This is a food grade fill fluid.
- (17) Only available with Thermal Range Expander.
- (18) Long-life power module must be shipped separately, order power module 701PBKKF.
- (19) Not available with output code A.
- (20) Option HR7 configures the HART output to HART Revision 7. This option requires the selection of the Advanced Diagnostics (DA2) option. The device with this option can be field configured to HART Revision 5 or 7 if desired.
- (21) Not available with output code X.
- (22) With option code 10, user must select seal location option code M in Rosemount DP Level PDS.
- (23) Requires Plantweb housing and output code A. Includes hardware adjustments as standard.
- (24) Not available with output code F.
- (25) Not available with output code F, option code DA2, or option code QT.
- (26) Not available with housing style codes 2E, 2F, 2G, 2M, 5A, 5J, or 7J.
- (27) This assembly is included with options EP, KP, E1, N1, K1, ND, E4, E7, N7, K7, E2, E3, KA, KC, KD. IA, IB, IE. IF, IG, K2, T1, EM, and KM.
- (28) Transmitter is shipped with 316 SST conduit plug (uninstalled) in place of carbon steel conduit plug.
- (29) Valid when SuperModule™ Platform and housing have equivalent approvals.
- (30) Not available with M20 or G½ conduit entry size.
- (31) Requires Plantweb housing and hardware adjustments option code D1. Limited availability depending on transmitter type and range. Contact an Emerson representative for additional information.
- (32) Silicone fill fluid is standard.

- (33) Materials of construction comply with metallurgical requirements highlighted within NACE MR0175/ISO 15156 for sour oil field production environments. Environmental limits apply to certain materials. Consult latest standard for details. Selected materials also conform to NACE MR0103 for sour refining environments. Order with Q15 or Q25 to receive a NACE certificate.
- (34) Not available with housing code 01 or 7J.
- (35) See the Rosemount 3051S [Reference Manual](#) for cable requirements. Contact an Emerson representative for additional information.
- (36) Not available with output code F or X. Not available with housing code 7J.
- (37) Not available with Housing code 5A, 5J, or 7J.
- (38) The T1 option is not needed with FISCO Product Certifications; transient protection is included in the FISCO product certification codes IA, IB, IE, IF, and IG.
- (39) Not available with Housing code 5A, 5J, or 7J. Available with Intrinsically Safe approvals only. For FM Intrinsically Safe; Nonincendive (option code I5) or FM FISCO Intrinsically Safe (option code IE), install in accordance with Rosemount drawing 03151-1009.

Diaphragm seals for Rosemount 3051SAL

Flush Flanged (FF) Seal

- Most common seal
- Good for use in general applications
- Easy installation on flanged connections ranging from 2-in. (DN 50) to 4-in. (DN 100)

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information .

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

(1) Not available with option code SC.

(2) Supplied with Thermo-tork® TN-9000 gasket if no other flushing connection ring gasket option is selected.

(3) Not available with Tantalum diaphragms (Material of Construction codes CC and DC).

Extended Flanged (EF) Seal

- Good for use in viscous applications with plugging issues
- Seal diaphragm installed flush with inner tank wall to prevent process plugging
- Easy installation on 3-in. (DN 80) and 4-in. (DN 100) flanged connections

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information .

Remote Flanged (RF) Seal

- Designed to improve performance on smaller process connections
- Easy installation on flanged connections ranging from ½- to 1½-in. (DN 25– DN 40)
- Lower housing/flushing ring required

Specification and selection of product materials, options, or components must be made by the purchaser of the equipment. See [Material selection](#) for more information .

The starred offerings (★) represent the most common options and should be selected for best delivery. The non-starred offerings are subject to additional delivery lead time.

Complete the 3051SAL model number by specifying options as needed:			
Table 8	ERS Transmitter options		
Table 9	Scalable level transmitter options		

(1) Clamp and Ethylene Propylene O-ring (conforms to 3-A standard 74 and USP Class VI) supplied.

(2) Diaphragm brazed and TIG-welded to extension.

(3) Requires option code RE (Electropolishing).

(4) Q16 is only available when the diaphragm seal has surface finish options (RG and RH).

Specifications

Performance specifications

Conformance to specification ($\pm 3\sigma$ [Sigma])

Technology leadership, advanced manufacturing techniques, and statistical process control ensure pressure measurement specification conformance to $\pm 3\sigma$ or better.

Reference accuracy

Stated reference accuracy equations include terminal based linearity, hysteresis, and repeatability. For FOUNDATION Fieldbus and wireless devices, use calibrated range in place of span.

For Rosemount 3051S assembled to Rosemount 1199 Remote Seals, use 3051SAL specifications.

Table 19: Transmitter with Coplanar Sensor Module (Single Variable)

Differential pressure (3051S_CD, 3051SMV__ 3 or 4)			
Gage pressure (3051S_CG, 3051SAM__G⁽¹⁾)			
	Ultra	Classic	Ultra for flow ⁽²⁾
Ranges 2–4	$\pm 0.025\%$ of span; For spans less than 10:1, $\pm(0.005 + 0.0035[\text{URL}/\text{Span}])\%$ of span	$\pm 0.035\%$ of span; For spans less than 10:1, $\pm(0.015 + 0.005[\text{URL}/\text{Span}])\%$ of span	$\pm 0.04\%$ of reading up to 8:1 DP turndown from URL; $\pm(0.04 + 0.0023[\text{URL}/\text{Reading}])\%$ of reading to 200:1 DP turndown from URL
Range 5	$\pm 0.05\%$ of span; For spans less than 10:1, $\pm(0.005 + 0.0045[\text{URL}/\text{Span}])\%$ of span	$\pm 0.065\%$ of span; For spans less than 10:1, $\pm(0.015 + 0.005[\text{URL}/\text{Span}])\%$ of span	N/A
Range 1	$\pm 0.09\%$ of span; For spans less than 15:1, $\pm(0.015 + 0.005[\text{URL}/\text{Span}])\%$ of span	$\pm 0.10\%$ of span; For spans less than 15:1, $\pm(0.025 + 0.005[\text{URL}/\text{Span}])\%$ of span	N/A
Range 0	$\pm 0.09\%$ of span; For spans less than 2:1, $\pm 0.045\%$ of URL	$\pm 0.10\%$ of span; For spans less than 2:1, $\pm 0.05\%$ of URL	N/A
Absolute pressure (3051S_CA, 3051SAM__A⁽¹⁾)			
	Ultra	Classic	
Ranges 1–4	$\pm 0.025\%$ of span; For spans less than 10:1, $\pm(0.004[\text{URL}/\text{Span}])\%$ of span	$\pm 0.035\%$ of span; For spans less than 10:1, $\pm(0.0065[\text{URL}/\text{Span}])\%$ of span	
Range 0	$\pm 0.075\%$ of span; For spans less than 5:1, $\pm(0.025 + 0.01[\text{URL}/\text{Span}])\%$ of span	$\pm 0.075\%$ of span; For spans less than 5:1, $\pm(0.025 + 0.01[\text{URL}/\text{Span}])\%$ of span	

(1) Specifications are for each gage/absolute pressure sensor of the ERS system and are not reflective of the DP calculation.

(2) Ultra for Flow is only available for 3051S_CD ranges 2-3. For calibrated spans from 1:1 to 2:1 of URL, add $\pm 0.005\%$ of span analog output error.

For Rosemount 3051S assembled to Rosemount 1199 Remote Seals, use 3051SAL specifications.

Table 20: Transmitter with In-Line Sensor Module

Absolute pressure (3051S_TA, 3051SAM_E ⁽¹⁾)		
Gage pressure (3051S_TG, 3051SAM_T ⁽¹⁾)		
	Ultra	Classic
Ranges 1–4	±0.025% of span For spans less than 10:1, ±(0.004[URL/ Span])% of span	±0.035% of span For spans less than 10:1, ±(0.0065[URL/ Span])% of span
Range 5	±0.04% of span For spans less than 10:1 ±0.004% of URL	±0.065% of span For spans less than 10:1 ±0.0065% of URL

(1) Specifications are for each gage/absolute pressure sensor of the ERS system and are not reflective of the DP calculation.

For Rosemount 3051S assembled to Rosemount 1199 Remote Seals, use 3051SAL specifications.

Table 21: Transmitter with Multivariable Sensor Module

Differential pressure and Static pressure (3051SMV_1 or 2)		
	Classic MV	Ultra for flow ⁽¹⁾
DP Ranges 2–3	±0.04% of span For spans less than 10:1, ±(0.01 + 0.004[URL/ Span])% of span	±0.04% of reading up to 8:1 DP turndown from URL ±(0.04 + 0.0023[URL/ Reading])% of reading to 200:1 DP turndown from URL
DP Range 4	±0.055% of span For spans less than 10:1, ±(0.015 + 0.005[URL/ Span])% of span	±0.05% of reading up to 3:1 DP turndown from URL ±(0.05 + 0.0145[URL/ RDG])% of reading to 100:1 DP turndown from URL
DP Range 5	±0.065% of span For spans less than 10:1, ±(0.015 + 0.005[URL/ Span])% of span	N/A
DP Range 1	±0.10% of span For spans less than 15:1, ±(0.025 + 0.005[URL/ Span])% of span	N/A
AP and GP Ranges 3–4 ⁽²⁾	±0.055% of span For spans less than 10:1, ±(0.0065[URL/ Span])% of span	±0.025% of span For spans less than 10:1, ±(0.004[URL/ Span])% of span

(1) Ultra for Flow is only available for Rosemount 3051SMV DP ranges 2-4. For calibrated DP spans from 1:1 to 2:1 of URL, add ±0.005% of span analog output error with transmitter output code A.

(2) For DP range 1, 4 or 5, Classic MV and Ultra for Flow static pressure accuracy is ±0.055% of span on SP Range 4 only. For spans less than 5:1, ±(0.013[URL/ Span])% of span.

Table 22: Liquid Level Transmitter

Rosemount 3051SAL		
	Ultra	Classic
Ranges 2–5	±0.055% of span For spans less than 10:1, ±(0.015 + 0.005[URL/ Span])% of span	±0.065% of span For spans less than 10:1, ±(0.015 + 0.005[URL/ Span])% of span

Reference Accuracy specifications for ERS system assume that the configuration contains two transmitters with identical sensor ranges, each transmitter sensor is calibrated 0 – URL, and the DP Span = 10% of transmitter URL.

Table 23: DP Reference Accuracy of Rosemount 3051S ERS System

2 Coplanar gage transmitters (3051SAM__G)		
	Ultra	Classic
Ranges 2–4	±0.035% of DP span	±0.049% of DP span
Range 5	±0.071% of DP span	±0.092% of DP span
2 Coplanar absolute transmitters (3051SAM__A)		
	Ultra	Classic
Ranges 1–4	±0.035% of DP span	±0.049% of DP span
2 In-line gage transmitters (3051SAM__T)		
	Ultra	Classic
Ranges 1–4	±0.035% of DP span	±0.049% of DP span
2 Liquid level transmitters (3051SAL)		
	Ultra	Classic
Ranges 1–5	±0.092% of DP span	±0.092% of DP span

Process temperature RTD interface

Specifications for process temperature are for the transmitter portion only. The transmitter is compatible with any Pt 100 (100 ohm platinum) RTD. Examples of compatible RTDs include Rosemount series 68 and 78 RTD Temperature Sensors.

Process temperature (3051SMV__1 or 3)
±0.67 °F (0.37 °C)

DP total accuracy for Enhanced ERS System performance

Includes full ambient and temperature range from –40 to 85 °C (–40 to 185 °F) requires two transmitters with identical sensor ranges. Specification are only applicable for spans down to 10:1.

Sensor type	3051SAM__G2, 3051SAL__G2 250 inH₂O (622,1 mbar)	3051SAM__G3, 3051SAL__G3 1000 inH₂O (2488,4 mbar)	3051SAM__T1, 3051SAL__T1 30 psi (2,1 bar)	3051SAM__T2, 3051SAL__T2 150 psi (10,34 bar)	3051SAM__G4, 3051SAL__G4 300 psi (20,7 bar)	3051SAM__T3, 3051SAL__T3 800 psi (55,2 bar)
Rosemount 3051SAM ⁽¹⁾	0.2 inH ₂ O (0,5 mbar)	0.6 inH ₂ O (1,4 mbar)	0.9 inH ₂ O (2,2 mbar)	1.5 inH ₂ O (4,0 mbar)	6.2 inH ₂ O (15 mbar)	7.8 inH ₂ O (19 mbar)
Rosemount 3051SAL with direct mount seal types and sizes below ⁽²⁾ : <ul style="list-style-type: none"> ■ FF, FC, PF ≥ 2-in./DN50 ■ EF ≥ 3-in./DN80 ■ All RT, RF, RC, SS ■ SC ≥ 2.5-in. 	2.2 inH ₂ O (5,5 mbar)	2.3 inH ₂ O (5,8 mbar)	3.0 inH ₂ O (7,5 mbar)	3.2 inH ₂ O (8,0 mbar)	6.5 inH ₂ O (16 mbar)	8.3 inH ₂ O (21 mbar)

Sensor type	3051SAM_G2, 3051SAL_G2 250 inH ₂ O (622,1 mbar)	3051SAM_G3, 3051SAL_G3 1000 inH ₂ O (2488,4 mbar)	3051SAM_T1, 3051SAL_T1 30 psi (2,1 bar)	3051SAM_T2, 3051SAL_T2 150 psi (10,34 bar)	3051SAM_G4, 3051SAL_G4 300 psi (20,7 bar)	3051SAM_T3, 3051SAL_T3 800 psi (55,2 bar)
Rosemount 3051SAL with other seal types and sizes	Consult Instrument Toolkit™ for performance.					

- (1) For Rosemount 3051SAM assembled to a Rosemount 1199 Diaphragm Seal, use Rosemount 3051SAL specification for identical seal types and sizes.
- (2) For Rosemount 3051SAL with direct mount seals, specification applies to process temperatures from -45 to 205 °C and excludes diaphragm option code SC, 6-mil diaphragm thickness. Seal types outside these parameters will require a Toolkit calculation for performance.

Transmitter total performance

Total performance is based on combined errors of reference accuracy, ambient temperature effect, and line pressure effect at normal operating conditions (70% of span typical reading, 740 psi [51 bar] line pressure).

Models	Ultra	Classic and classic MV	Ultra for flow ⁽¹⁾
3051S_CD	Ranges 2–3	For ±50 °F (28 °C) temperature changes, 0–100% relative humidity, from 1:1 to 5:1 rangedown	For ±50 °F (28 °C) temperature changes, 0–100% relative humidity, over 8:1 DP turn-down from URL
3051S_CG	Ranges 2–5		
3051S_CA	Ranges 2–4		
3051S_T	Ranges 2–4		
3051SMV ⁽²⁾	DP Ranges 2–3		
3051SAM_G ⁽³⁾	Ranges 2–5		
3051SAM_A ⁽³⁾	Ranges 2–4		
3051SAM_T ⁽³⁾	Ranges 2–4		
3051SAM_E ⁽³⁾	Ranges 2–4		
3051SAL	Use Instrument Toolkit or the QZ Option to quantify the total performance of a remote seal assembly under operating conditions.		

- (1) Ultra for Flow is only available for 3051S_CD Ranges 2–3 and 3051SMV DP Ranges 2–4.
- (2) For Rosemount 3051SMV, Transmitter Total Performance specification applies to differential pressure measurement only.
- (3) Specifications are for each gage/absolute pressure sensor of the ERS system and are not reflective of the DP calculation.

Multivariable flow performance

Note

Flow performance specifications assume device is configured for full compensation of static pressure, process temperature, density, viscosity, gas expansion, discharge coefficient, and thermal correction variances over the specified process operating range using multivariable type M or flow meter measurement types 1 through 4.

Mass, Energy, Actual Volumetric, and Totalized Flow Reference Accuracy ⁽¹⁾		
Models	Ultra for flow	Classic MV ⁽²⁾
3051SMV ⁽³⁾		
DP Ranges 2–3	±0.65% of Flow Rate over a 14:1 flow range (200:1 DP range)	±0.70% of Flow Rate over 8:1 flow range (64:1 DP range)
DP Range 1	N/A	±0.90% of Flow Rate over 8:1 flow range (64:1 DP range)

Warranty

Note

Warranty details can be found in Emerson Terms and Conditions of Sale, Document 63445, Rev G (10/06).

Models	Ultra, Enhanced, and Ultra for flow ⁽¹⁾	Classic and Classic MV ⁽²⁾	Optional extended warranty ⁽³⁾
All Rosemount 3051S Products	15-year limited warranty	1-year limited warranty	WR3: 3-year limited warranty WR5: 5-year limited warranty

- (1) Rosemount Ultra and Ultra for Flow transmitters have a limited warranty of 15 years from date of shipment. All other provisions of Emerson standard limited warranty remain the same.
- (2) Goods are warranted for 12 months from the date of initial installation or 18 months from the date of shipment by seller, whichever period expires first.
- (3) Rosemount extended warranties have a limited warranty of three or five years from date of shipment.

Dynamic performance

For FOUNDATION Fieldbus (output code F), add 52 ms to stated values (not including segment macro-cycle). For option code DA2, add 45 ms (nominal) to stated values.

Consult Instrument Toolkit for transmitter configurations with remote seals including 3051SAL.

Table 26: Total Time Response at 75 °F (24 °C), Includes Dead Time

Table 32: Liquid Level Transmitter

Rosemount 3051SAL	
Ultra	Classic
See Instrument Toolkit.	See Instrument Toolkit.

Process temperature RTD interface

Specifications for process temperature are for the transmitter portion only. The transmitter is compatible with any Pt 100 (100 ohm platinum) RTD. Examples of compatible RTDs include Rosemount series 68 and 78 RTD Temperature Sensors.

Table 33: Process Temperature (3051SMV__1 or 3)

Classic MV Per 50 °F (28 °C)	Ultra for flow -40 to 185 °F (-40 to 85 °C)
±0.39 °F (0,216 °C) per 50 °F (28 °C)	±0.39 °F (0,216 °C) per 50 °F (28 °C)

Line pressure effect

Note

The line pressure effect specifications also apply to option code P9, where applicable.

3051S_CD 3051SMV (DP measurement only)	Ultra and Ultra for flow	Classic and classic MV
Zero error ⁽¹⁾		
Range 2–3	± 0.025% URL per 1000 psi (68,95 bar)	± 0.05% URL per 1000 psi (68,95 bar)
Range 0	± 0.125% URL per 100 psi (6,89 bar)	± 0.125% URL per 100 psi (6,89 bar)
Range 1	± 0.25% URL per 1000 psi (68,95 bar)	± 0.25% URL per 1000 psi (68,95 bar)
Span error ⁽²⁾		
Range 2–3	± 0.1% of reading per 1000 psi (68,95 bar)	± 0.1% of reading per 1000 psi (68,95 bar)
Range 0	± 0.15% of reading per 100 psi (6,89 bar)	± 0.15% of reading per 100 psi (6,89 bar)
Range 1	± 0.4% of reading per 1000 psi (68,95 bar)	± 0.4% of reading per 1000 psi (68,95 bar)

(1) Zero error can be removed by performing a zero trim at line pressure.

(2) Specifications for option code P0 are 2 times those shown above.

Mounting position effects

Models	Ultra, Ultra for flow, Classic and Classic MV	
3051S_CD or CG 3051SMV__3 or 4 3051SF_3, 4, 7, or D 3051SAM__G	Zero shifts up to ±1.25 inH ₂ O (3,11 mbar), which can be zeroed span: no effect	
3051S_CA 3051S_T 3051SAM__A, T, or E	Zero shifts to ±2.5 inH ₂ O (6,22 mbar), which can be zeroed span: no effect	
3051SMV__1 or 2 3051SF_1, 2, 5, or 6	DP Sensor	Zero shifts up to ±1.25 inH ₂ O (3,11 mbar), which can be zeroed span: no effect
	GP/AP Sensor	Zero shifts to ±2.5 inH ₂ O (6,22 mbar), which can be zeroed span: no effect
3051SAL	With liquid level diaphragm in vertical plane, zero shift of up to ±1 inH ₂ O (2,49 mbar). With diaphragm in vertical plane, zero shift of up to ±5 inH ₂ O (12,43 mbar) plus extension length on extended units. All zero shifts can be zeroed. Span: no effect	

Vibration effect

Less than ±0.1% of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10–60 Hz 0.21 mm displacement peak amplitude/60–2000 Hz 3g).

For Housing Style codes 1J, 1K, 1L, 2J, and 2M: Less than $\pm 0.1\%$ of URL when tested per the requirements of IEC60770-1 field with general application or pipeline with low vibration level (10–60 Hz 0.15 mm displacement peak amplitude/60–500 Hz 2g).

Power supply effect

Less than $\pm 0.005\%$ of calibrated span per volt change in voltage at the transmitter terminals

Electromagnetic compatibility (EMC)

Meets all industrial environment requirements of EN61326 and NAMUR NE-21.

Note

NAMUR NE-21 is met on Rosemount 3051SMV output type A if no external temperature sensor is attached. NAMUR NE-21 does not apply to wireless output code X or ERS configurations.

Maximum deviation < 1% Span during EMC disturbance.

Note

During surge event device may exceed maximum EMC deviation limit or reset; however, device will self-recover and return to normal operation within specified start-up time. For devices with Junction Box housing or Remote Display (housing styles: 2A-2C, 2E-2G, 2J, 2M) testing performed with shielded cable. Rosemount 3051SMV Measurement Type 1, 3, 5, 6 and Rosemount 3051SF Measurement Type 1, 3, 5, 7 require shielded cable for the process temperature connection.

Transient protection (option T1)

Tested in accordance with IEEE C62.41.2-2002, Location Category B

- 6 kV crest (0.5 μ s – 100 kHz)
- 3 kA crest (8 \times 20 microseconds)
- 6 kV crest (1.2 \times 50 microseconds)

5	N/A	20.0 psi (1,38 bar)
Range	Static Pressure Sensor (GP/AP)	
	Ultra for Flow	Classic MV
3	4.0 psi (275,79 mbar)	8.0 psi (551,58 mbar)
4	18.13 psi (1,25 bar)	36.26 psi (2,50 bar)

Process temperature RTD interface (3051SMV__1 or 3, 3051SF_1, 3, 5 or 7)

Minimum span = 50 °F (28 °C)

DP span considerations for ERS applications

It is recommended that the DP rangedown (operating pressure/DP span) for ERS applications not exceed 100:1. Consult with Emerson sales representative when considering a Rosemount 3051S ERS System for applications beyond 100:1 rangedown.

Service**Rosemount 3051S, 3051SMV_P, 3051SAM, and 3051SF_5, 6, 7, or D (Direct Process Variable Output)**

Liquid, gas, and vapor applications

Rosemount 3051SAL

Liquid level applications

Rosemount 3051SMV_M and 3051SF_1, 2, 3, or 4 (Mass and Energy Flow Output)**Note**

For option code A: 4-20mA HART only.

Some fluid types are only supported by certain measurement types.

Table 42: Fluid Compatibility with Pressure and Temperature Compensation

		Fluid types			
Ordering code	Measurement type	Liquids	Saturated steam	Superheated steam	Gas and natural gas
		1	DP/P/T (full compensation)	•	•
2	DP/P	•	•	•	•
3	DP/T	•	•	—	—
4	DP only	•	•	—	—

4–20 mA HART® protocol

Zero and span adjustment

Zero and span values can be set anywhere within the range. Span must be greater than or equal to the minimum span.

Output

The 2-wire 4–20 mA is user-selectable for linear or square root output. Digital process variable superimposed on 4–20 mA signal is available to any host that conforms to the HART protocol.

Power supply

External power supply required.

- Rosemount™ 3051S and 3051SF_D: 10.5 to 42.4 Vdc with no load
- Rosemount 3051S and 3051SF_D with Advanced HART Diagnostics Suite: 12 to 42.4 Vdc with no load
- Rosemount 3051SMV™ and 3051SF_1-7: 12 to 42.4 Vdc with no load
- Rosemount 3051S ERS™ System: 16.0 to 42.4 Vdc with no load

Load limitations

Maximum loop resistance is determined by the voltage level of the external power supply, as described by:

Figure 1: Rosemount 3051S and 3051SF_D

Maximum Loop Resistance = $43.5 \times (\text{Power Supply Voltage} - 10.5)$

The Field Communicator requires a minimum loop resistance of 250 Ω for communication.

- A. Load (Ohms)
- B. Operating region
- C. Voltage (Vdc)

Figure 2: Rosemount 3051SMV and 3051SF_1-7, 3051S and 3051SF_D with HART Diagnostics (option code DA2)

Maximum Loop Resistance = $43.5 \times (\text{Power Supply Voltage} - 12.0)$

The Field Communicator requires a minimum loop resistance of 250 Ω for communication.

- A. Load (Ohms)
- B. Operating region
- C. Voltage (Vdc)

Figure 3: Rosemount 3051S ERS System

If supply voltage ≤ 16.74 Vdc: Maximum Loop Resistance = $277 \times (\text{Power Supply Voltage} - 16.0)$
 If supply voltage > 16.74 Vdc: Maximum Loop Resistance = $43.5 \times (\text{Power Supply Voltage} - 12.0)$

The Field Communicator requires a minimum loop resistance of 250 Ω for communication.

- A. Load (Ohms)
- B. Operating region
- C. Voltage (Vdc)

Selectable HART revisions (option code HR7)

The 2-wire 4–20 mA is user-selectable for linear or square root output. Digital process variable superimposed on 4–20 mA signal is available to any host that conforms to HART protocol. The Rosemount 3051S with Advanced HART Diagnostics (DA2) comes with Selectable HART revisions. Digital communications based on HART Revision 7 (with option code HR7 selected) or Revision 5 (default) protocol can be selected. The HART revision can be switched in the field using any HART-based configuration. See the Rosemount 3051S [Reference Manual](#) for instructions on how to switch HART revision.

Advanced HART diagnostics suite (Option Code DA2)

The Process Integrity diagnostic provides statistical data (standard deviation, mean, coefficient of variation) that can be used to detect process and process equipment anomalies including but not limited to:

- furnace flame instability
- pump cavitation
- distillation column flooding
- fluid composition change

- entrained air
- agitation loss
- process leak

This diagnostic allows you to take preventative measures before abnormal process situations result in unscheduled downtime or rework.

The Loop Integrity diagnostic pro-actively detects and notifies you of changes in the electrical loop before they affect your process operation. Example loop problems that can be detected include water in the terminal compartment, corrosion of terminals, improper grounding, and unstable power supplies.

The Plugged Impulse Line diagnostic uses the same statistical processing technology as Process Integrity to detect plugging in impulse piping that may prevent the transmitter from obtaining an accurate process reading. It can also detect and alert you to other process connection issues, such as plugged Annubar or orifice plate process taps.

The Device Dashboard presents the diagnostics in a graphical, task-based interface that provides single click access to critical process/device information and descriptive graphical troubleshooting.

Suite includes: Process Intelligence, Loop Integrity, Plugged Impulse Line, Status Log, Variable Log, Advanced Process Alerts, Service Alerts, and Time Stamp capability.

FOUNDATION™ Fieldbus protocol

Power supply

External power supply required; transmitters operate on 9.0–32.0 Vdc (9.0–17.5 Vdc for FISCO) transmitter terminal voltage.

Current draw

17.5 mA for all configurations (including LCD display option)

Parameters:

- Schedule entries: 22 (max.)
- Links: 25 (max.)
- Virtual Communications Relationships (VCR): 20 (max.)

Standard function blocks

Resource Block	Contains hardware, electronics, and diagnostic information.
Transducer Block	Contains actual sensor measurement data including the sensor diagnostics and the ability to trim the pressure sensor or recall factory defaults.
LCD display Block	Configures the local display.
Analog Input Blocks	Processes the measurements for input into other function blocks. The output value is in engineering or custom units and contains a status indicating measurement quality.
PID Block with Auto-tune	Contains all logic to perform PID control in the field including cascade and feedforward. Auto-tune capability allows for superior tuning for optimized control performance.

Backup Link Active Scheduler (LAS)

The transmitter can function as a Link Active Scheduler if the current link master device fails or is removed from the segment.

Software upgrade in the field

Software for the Rosemount™ 3051S with FOUNDATION Fieldbus is easy to upgrade in the field using the FOUNDATION Fieldbus Common Device Software Download procedure.

Plantweb alerts

Enable the full power of the Plantweb™ digital architecture by diagnosing instrumentation issues, communicating advisory, maintenance, and failure details, and recommending a solution.

Advanced control function block suite (option code A01)

- Input selector block** Selects between inputs and generates an output using specific selection strategies such as minimum, maximum, midpoint, average, or first “good.”
- Arithmetic block** Provides pre-defined application-based equations including flow with partial density compensation, electronic remote sensors, hydrostatic tank gauging, ratio control and others.
- Signal characterizer block** Characterizes or approximates any function that defines an input/output relationship by configuring up to twenty X, Y coordinates. The block interpolates an output value for a given input value using the curve defined by the configured coordinates.
- Integrator block** Compares the integrated or accumulated value from one or two variables to pre-trip and trip limits and generates discrete output signals when the limits are reached. This block is useful for calculating total flow, total mass, or volume over time.
- Output splitter block** Splits the output of one PID or other control block so that the PID will control two valves or other actuators.
- Control selector block** Selects one of up to three inputs (highest, middle, or lowest) that are normally connected to the outputs of PID or other control function blocks.

Block	Execution time
Resource	N/A
Transducer	N/A
LCD Display Block	N/A
Analog Input 1	20 milliseconds
PID with Auto-tune	35 milliseconds
Input Selector	20 milliseconds
Arithmetic	20 milliseconds
Signal Characterizer	20 milliseconds
Integrator	20 milliseconds
Output Splitter	20 milliseconds
Control Selector	20 milliseconds

FOUNDATION Fieldbus diagnostics suite (option code D01)

Note

Only applies to Rosemount 3051S with transmitter output code F.

Process Intelligence provides statistical data (standard deviation and mean) that can be used to detect process and process equipment anomalies, including:

- furnace flame instability
- pump cavitation
- distillation column flooding
- fluid composition change

- entrained air
- agitation loss
- process leak

This diagnostic allows you to take preventative measures before abnormal process situations result in unscheduled downtime or rework.

The Plugged Impulse Line diagnostic uses the same statistical processing technology as Process Intelligence to detect plugging in impulse piping that may prevent the transmitter from obtaining an accurate process reading. It can also detect and alert you to other process connection issues, such as plugged Annubar or orifice plate process taps.

The Device Dashboard presents the diagnostics in a graphical, task-based interface that provides single click access to critical process/device information and descriptive graphical troubleshooting.

Suite includes: Process Intelligence and Plugged Impulse Line diagnostics.

IEC 62591 (*WirelessHART*[®] protocol)

Output

IEC 62591 (*WirelessHART*), 2.4 GHz DSSS

Radio frequency power output from antenna

- External antenna (WK option): Maximum of 10 mW (10 dBm) EIRP
- Extended range, external antenna (WM option): Maximum of 18 mW (12.5 dBm) EIRP
- Remote (WJ option) antenna: Maximum of 17 mW (12.3 dBm) EIRP
- High-gain, remote antenna (WN option): Maximum of 40 mW (16 dBm) EIRP

Local display

The optional seven-digit LCD display can display user-selectable information such as primary variable in engineering units, percent of range, sensor module temperature, and electronics temperature. The display updates based on the wireless update rate.

Update rate

User selectable 1 second to 60 minutes.

Power module

Field replaceable, keyed connection eliminates the risk of incorrect installation, Intrinsically Safe Lithium-thionyl chloride Power Module with polybutadine terephthalate (PBT) enclosure. Ten-year life at one minute update rate.⁽¹⁾⁽²⁾

Overpressure limits

Transmitters withstand the following limits without damage:

(1) Reference conditions are 70 °F (21 °C), and routing data for three additional network devices. Note: Continuous exposure to ambient temperature limits of -40 °F or 185 °F (-40 °C or 85 °C) may reduce specified life by less than 20 percent.

(2) 6.5-year life at one minute update rates when used with 3051SMV.

Table 43: Coplanar Sensor Module (Single Variable)

Range	DP ⁽¹⁾ and GP	AP
	3051S_CD, 3051S_CG 3051SMV__3 or 4 3051SF_3, 4, 7, or D 3051SAM__G	3051S_CA 3051SAM__A
0	750 psi (51,71 bar)	60 psia (4,14 bar)
1	2000 psi (137,90 bar)	750 psia (51,71 bar)
2	3626 psi (250,00 bar)	1500 psia (103,42 bar)
3	3626 psi (250,00 bar)	1600 psia (110,32 bar)
4	3626 psi (250,00 bar)	6000 psia (413,69 bar)
5	3626 psi (250,00 bar)	N/A

(1) The overpressure limit of a DP Sensor with the P9 option is 4500 psig (310,3 bar). The overpressure limit of a DP Sensor with the P0 option is 6092 psig (420 bar).

	3051S_TG 3051SAM__T	3051S_TA 3051SAM__E
1	750 psi (51,71 bar)	
2	1500 psi (103,42 bar)	
3	1600 psi (110,32 bar)	
4	6000 psi (413,69 bar)	
5	15000 psi (1034,21 bar)	

Coplanar multivariable sensor module (3051SMV__1 or 2, 3051SF_1, 2, 5, or 6)

DP Range	Static Pressure Range (GP/AP)	
	3	4
1	1600 psi (110,32 bar)	2000 psi (137,90 bar)
2	1600 psi (110,32 bar)	3626 psi (250,00 bar)
3	1600 psi (110,32 bar)	3626 psi (250,00 bar)
4	N/A	3626 psi (250,00 bar)
5	N/A	3626 psi (250,00 bar)

Liquid level transmitter (Rosemount 3051SAL)

Overpressure limit is dependent on the flange rating or sensor rating (whichever is lower). Use Instrument Toolkit to ensure the seal system meets all pressure and temperature limits.

Static pressure limits**Coplanar sensor module (single variable)**

Operates within specifications between static line pressures of:

Range	DP Sensor ⁽¹⁾
	3051S_CD
	3051SMV__3 or 4 3051SF_3, 4, 7, or D
0	0.5 psia to 750 psig (0,03 to 51,71 bar)
1	0.5 psia to 2000 psig (0,03 to 137,90 bar)
2	0.5 psia to 3626 psig (0,03 to 250,00 bar)
3	0.5 psia to 3626 psig (0,03 to 250,00 bar)
4	0.5 psia to 3626 psig (0,03 to 250,00 bar)
5	0.5 psia to 3626 psig (0,03 to 250,00 bar)

(1) The static pressure limit of a DP Sensor with the P9 option is 4500 psig (310,26 bar). The static pressure limit of a DP Sensor with the P0 option is 6092 psig (420,00 bar).

Coplanar multivariable sensor module

(3051SMV__1 or 2, 3051SF_1, 2, 5, or 6)

Operates within specifications between static line pressures of 0.5 psia (0,03 bar) and the values in the table below:

DP Range	Static Pressure Range (GP/AP)	
	3	4
1	800 psi (55,15 bar)	2000 psi (137,90 bar)
2	800 psi (55,15 bar)	3626 psi (250,00 bar)
3	800 psi (55,15 bar)	3626 psi (250,00 bar)
4	N/A	3626 psi (250,00 bar)
5	N/A	3626 psi (250,00 bar)

Maximum working pressure limits

Maximum working pressure is the maximum pressure allowed for normal transmitter operation. For a differential pressure transmitter, the maximum working pressure is the static line pressure under which the transmitter can safely operate. If one side of the transmitter is exposed to the full static line pressure due to mis-valving, the transmitter will experience an output shift and must be re-zeroed. For a gage or absolute pressure transmitter, the maximum working pressure is the same as the Upper Range Limit (URL). The maximum working pressure of transmitters with assemble-to options is limited by the lowest maximum pressure rating of the individual components.

Table 45: Rosemount 3051S Maximum Working Pressure

Range	3051S_CD 3051SAL__D 3051SAM__D	3051S_CG 3051SAL__G 3051SAM__G	3051S_CA 3051SAL__A 3051SAM__A	3051S_TA 3051SAL__E 3051SAM__E	3051S_TG 3051SAL__T 3051SAM__T

SYL THERM™ XLT	-157 to 293 °F (-105 to 145 °C)

⁽³⁾ LCD display may not be readable and LCD display updates will be slower at temperatures below -4 °F (-20 °C).

Silicone 704 ⁽⁷⁾	32 to 599 °F (0 to 315 °C)
Silicone 705 ⁽⁷⁾	68 to 698 °F (20 to 370 °C)
UltraTherm™ 805	770 °F (410 °C) with 850 °F (454 °C) design ⁽⁸⁾
Silicone 200	-49 to 401 °F (-45 to 205 °C)
Tri-Therm 300	-40 to 401 °F (-40 to 205 °C)
Inert (Halocarbon)	-49 to 320 °F (-45 to 160 °C)
Glycerin and water ⁽⁹⁾⁽¹⁰⁾	5 to 203 °F (-15 to 95 °C)
Neobee® M-20 ⁽⁹⁾	5 to 437 °F (-15 to 225 °C)
Propylene glycol and water ⁽⁹⁾⁽¹⁰⁾	5 to 203 °F (-15 to 95 °C)

- (1) The maximum ambient temperature is reduced by 1.5° for every degree by which the process fluid temperature exceeds 185 °F (85 °C).
- (2) 220 °F (104 °C) limit in vacuum service; 130 °F (54 °C) for pressures below 0.5 psia.
- (3) The maximum ambient temperature is reduced by 1.0° for every degree by which the process fluid temperature exceeds 185 °F (85 °C) for all traditional flanges and vertical mount level flanges.
- (4) -20 °F (-29 °C) is the lower process temperature limit with option code P0.
- (5) 160 °F (71 °C) limit in vacuum service.
- (6) Not available for 3051S_CA.
- (7) Only available with Seal Connection Type/Capillary ID, Description Codes C, D, F, G, J, K, N, and P.
- (8) UltraTherm 805 supports maximum design temperature of 850 °F (454 °C). Design temperature rating is for non-continuous use with a cumulative exposure time less of than 12 hours. Continuous use temperature is rated to 770 °F (410 °C).
- (9) This is a food grade fill fluid.
- (10) Not suitable for vacuum applications.

Thermal Range Expander temperature operating range

- Silicone 704
- Silicone 705
- UltraTherm 805
- A. Ambient temperature (°C)
- B. Process temperature (°C)

Humidity limits

0–100% relative humidity

Turn-on time

When power is applied to the transmitter during startup, performance will be within specifications per the time period described below:

Note

Does not apply to wireless option code X.

For option code F, device will communicate on a segment in less than 20 seconds.

Transmitter	Turn-on time (typical)
3051S, 3051SF_D, 3051SAL__C	2 seconds
Diagnostics	5 seconds
3051SMV, 3051SF_1-7	5 seconds
3051S ERS System	6 seconds

Volumetric displacement

Less than 0.005 in³ (0,08 cm³)

Damping

Note

Does not apply to wireless option code X.

Analog output response time to a step change is user-selectable from 0 to 60 seconds for one time constant. For Rosemount 3051SMV, 3051SF_1-7, each variable can be individually adjusted. Software damping is in addition to sensor module response time.

Failure mode alarm

4–20 mA HART (output option code A)

If self-diagnostics detect a gross transmitter failure, the analog signal will be driven offscale to alert the user. Rosemount standard (default), NAMUR, and custom alarm levels are available (see [Alarm configuration](#)).

High or low alarm signal is software-selectable or hardware-selectable via the optional switch (option D1).

Alarm configuration

Configuration	High alarm	Low alarm
Default	≥ 21.75 mA	≤ 3.75 mA
NAMUR compliant ⁽¹⁾	≥ 22.5 mA	≤ 3.6 mA
Custom levels ⁽²⁾⁽³⁾	20.2 - 23.0 mA	3.4 - 3.8 mA

(1) Analog output levels are compliant with NAMUR recommendation NE 43, see option codes C4 or C5.

(2) Low alarm must be 0.1 mA less than low saturation and high alarm must be 0.1 mA greater than high saturation.

(3) For Rosemount 3051SMV and option code DA2, low alarm custom values are 3.57 - 3.8 mA.

Physical specifications

Material selection

Emerson™ provides a variety of Rosemount™ products with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser's sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

Electrical connections

½–14 NPT, G½, and M20 × 1½ conduit. HART® interface connections fixed to terminal block for Output code A and X.

Process connections

Coplanar sensor module (3051S_C, 3051SMV, 3051SF, 3051SAM__G or A)	
Standard	¼–18 NPT on 2½-in. centers
Flange Adapters	½–14 NPT and RC½ on 2-in. (50.8 mm), 2⅛-in. (54.0 mm), or 2¼-in. (57.2 mm) centers
In-line sensor module (3051S_T, 3051SAM__T or E)	
Standard	½–14 NPT Female
F11 Code	Non-threaded instrument flange (available in SST for sensor ranges 1–4 only)
G11 Code	G½ A DIN 16288 male (available in SST for sensor ranges 1–4 only)
H11 Code	Autoclave type F-250C (Pressure relieved 9/16–18 gland thread; ¼ OD high pressure tube 60° cone; available in SST for sensor range 5 only)
Level transmitter (Rosemount 3051SAL)	
FF Seal	2-in. (DN 50), 3-in. (DN 80), or 4-in. (DN 100); ANSI Class 150, 300, 600, 900, 1500, and 2500 flange; JIS 10K, 20K, or 40K flange; PN 10/16 or PN 40 flange
PF Seal	
EF Seal	
RF Seal	1-in. (DN 25) or 1½-in. (DN 40); ANSI Class 150, 300, or 600 flange; JIS 10K, 20K, or 40K flange; PN 40 flange
RT Seal	¼–18, ½–14, ¾–14, or 1–11.5 NPT Female
FC Seal	2-in. or 3-in.; ANSI Class 150, 300, 600, 900, 1500, 2500 flange; PN 63 or PN 100 flange
RC Seal	½-in., ¾-in., 1-in., or 1½-in.; ANSI Class 150, 300, 600, 900, 1500, 2500 flange; PN 63 or PN 100 flange
SC Seal	1½-in, 2-in, or 3-in. Hygienic Tri-Clover Style Tri Clamp
SS Seal	4-in. Hygienic Tank Spud

Process-wetted parts

Process isolating diaphragms

Coplanar sensor module (3051S_C, 3051SMV)	
316L SST (UNS S31603), Alloy C-276 (UNS N10276), Alloy 400 (UNS N04400), Tantalum (UNS R05440), Gold-Plated Alloy 400, Gold-plated 316L SST	
B11 Code	Low side process connection is SST
In-line sensor module (3051S_T)	
316L SST (UNS S31603), Alloy C-276 (UNS N10276)	
Level transmitter (Rosemount 3051SAL)

(Drain vent seat: Alloy 400, Drain vent stem: Alloy K-500)

Process flanges and flange adapters

Plated carbon steel

SST: CF-8M (Cast 316 SST) per ASTM A743

Cast C-276: CW-12MW per ASTM A494

Cast Alloy 400: M-30C per ASTM A494

Wetted O-rings

Glass-filled PTFE (Graphite-filled PTFE with isolating diaphragm code 6)

Rosemount 3051SAL mounting flange

Zinc-cobalt plated CS or 316 SST

Rosemount 3051SAL seal extension

CF-3M (Cast 316L SST, material per ASTM A743) or CW-12MW (Cast C-276, material per ASTM A494)

Non-wetted parts

Electronics housing

Low-copper aluminum alloy or CF-8M (Cast 316 SST)

Enclosures meet NEMA[®] Type 4X, IP66, and IP68 [66 ft (20 m) for 168 hours] when properly installed.

Note

IP 68 not available with Wireless output.

Coplanar sensor module housing

SST: CF-3M (Cast 316L SST)

Bolts

Plated carbon steel per ASTM A449, Type 1

Austenitic 316 SST per ASTM F593

ASTM A453, Class D, Grade 660 SST

⁽⁴⁾ Alloy 400/K-500 is not available with Rosemount 3051SAL.

ASTM A193, Grade B7M alloy steel

ASTM A193, Class 2, Grade B8M SST

Alloy K-500

Sensor module fill fluid

Silicone is standard.

Inert is available as option code (L1).⁽⁵⁾

Inert for in-line series uses Fluorinert™ FC-43.

Inert for coplanar series uses Halocarbon

Seal fill fluid (liquid level only)

Rosemount 3051SAL: Silicone 200, Tri-Therm 300, Silicone 704, Silicone 705, UltraTherm 805, inert, SYLTHERM™ XLT, Neobee® M-20, glycerin and water, propylene glycol and water.

Paint for aluminum housing

A copy of the EU Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EU Declaration of Conformity can be found at Emerson.com/Rosemount.

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing Equipment in North America

The US National Electrical Code (NEC[®]) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

USA

E5 US Explosionproof (XP) and Dust-Ignitionproof (DIP)

Certificate FM16US0090

Standards FM Class 3600 - 2011, FM Class 3615 - 2006, FM Class 3616 - 2011, FM Class 3810 - 2005, ANSI/NEMA 250 - 2003

Markings XP CL I, DIV 1, GP B, C, D; DIP CL II, DIV 1, GP E, F, G; CL III; T5(-50 °C ≤ T_a ≤ +85 °C); Factory Sealed; Type 4X

I5 US Intrinsic Safety (IS) and Nonincendive (NI)

Certificate FM16US0089X

Standards FM Class 3600 - 2011, FM Class 3610 - 2010, FM Class 3611 - 2004, FM Class 3810 - 2005, NEMA[®] 250 - 2003

Markings IS CL I, DIV 1, GP A, B, C, D; CL II, DIV 1, GP E, F, G; Class III; Class 1, Zone 0 AEx ia IIC T4; NI CL 1, DIV 2, GP A, B, C, D; T4(-50 °C ≤ T_a ≤ +70 °C) [HART]; T4(-50 °C ≤ T_a ≤ +60 °C) [Fieldbus]; when connected per Rosemount drawing 03151-1006; Type 4X

Special Condition for Safe Use:

1. The Model 3051S/3051S-ERS Pressure Transmitter contains aluminum and is considered to constitute a potential risk of ignition by impact or friction. Care must be taken into account during installation and use to prevent impact and friction.

Note

Transmitters marked with NI CL 1, DIV 2 can be installed in Division 2 locations using general Division 2 wiring methods or Nonincendive Field Wiring (NIFW). See Drawing 03151-1006.

IE US FISCO Intrinsically Safe

Certificate FM16US0089X

Standards FM Class 3600 - 2011, FM Class 3610 - 2010, FM Class 3611 - 2004, FM Class 3810 - 2005, NEMA 250 - 2003

Markings IS CL I, DIV 1, GP A, B, C, D; T4(-50 °C ≤ T_a ≤ +60 °C); when connected per Rosemount drawing 03151-1006; Type 4X

Special Condition for Safe Use:

1. The Rosemount 3051S/3051S-ERS Pressure Transmitter contains aluminum and is considered to constitute a potential risk of ignition by impact or friction. Care must be taken into account during installation and use to prevent impact and friction.

E1 ATEX Flameproof

Certificate KEMA 00ATEX2143X

Standards EN 60079-0:2012+A11:2013, EN 60079-1:2014, EN 60079-26:2015

Markings 

II 1/2 G Ex db IIC T6...T4 Ga/Gb, T6(-60 °C ≤ T_a ≤ +70 °C), T5/T4(-60 °C ≤ T_a ≤ +80 °C)

Table 52: Process Temperature

Temperature class	Process temperature
T6	-60 °C to +70 °C
T5	-60 °C to +80 °C
T4	-60 °C to +120 °C

Special Conditions for Safe Use (X):

1. This device contains a thin wall diaphragm less than 1 mm thickness that forms a boundary between Category 1 (process connection) and Category 2 (all other parts of the equipment). The model code and datasheet are to be consulted for details of the diaphragm material. Installation, maintenance and use shall take into account the environmental conditions to which the diaphragm will be subjected. The manufacturer's instructions for installation and maintenance shall be followed in detail to assure safety during its expected lifetime.
2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.
4. Appropriate cable, glands and plugs need to be suitable for a temperature of 5 °C greater than maximum specified temperature for location where installed.

I1 ATEX Intrinsic Safety

 3051S-ERS: Ex d IIC T4~T6 Ga/Gb

Special Conditions for Safe Use (X):

1. Only the pressure transmitters, consisting of 3051SC Series, 3051ST Series, 3051SL Series and 300S Series, are certified.
2. Flameproof joints are not intended for repair.
3. The ambient temperature range for the 3051S and 3051SFx in a dust environment is $-20\text{ °C} \leq T_a \leq 85\text{ °C}$.
4. The relation between temperature class and maximum temperature of process medium is as follows:

Temperature class	Ambient temperature (°C)	Process temperature (°C)
T6	$-60\text{ °C} \leq T_a \leq +70\text{ °C}$	$-60\text{ °C} \leq T_a \leq +70\text{ °C}$
T5	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$
T4	$-60\text{ °C} \leq T_a \leq +80\text{ °C}$	$-60\text{ °C} \leq T_a \leq +120\text{ °C}$

5. The earth connection facility in the enclosure should be connected reliably.
6. During installation, use and maintenance of transmitter, observe the warning "Don't open the cover when the circuit is alive."
7. During installation, there should be no mixture harm to flameproof housing.
8. Cable entry, certified by NEPSI with type of protection Ex d IIC in accordance with GB3836.1-2000 and GB3836.2-2000, should be applied when installation in hazardous location. 5 full threads should be in engagement when the cable entry is assembled onto the transmitter. When pressure transmitter is used in the presence of combustible dust, the ingress of protection of the cable entry should be IP66.
9. The diameter of cable should observe the instruction manual of cable entry. The compressing nut should be fastened. The aging of seal ring should be changed in time.
10. Maintenance should be done in non-hazardous location.
11. End users are not permitted to change any components inside.
12. When installation, use and maintenance of transmitter, observe following standards:
 - GB3836.13-2013 "Electrical apparatus for explosive gas atmospheres Part 13: Repair and overhaul for apparatus used in explosive gas atmospheres"
 - GB3836.15-2000 "Electrical apparatus for explosive gas atmospheres Part 15: Electrical installations in hazardous area (other than mines)"
 - GB3836.16-2006 "Electrical apparatus for explosive gas atmospheres Part 16: Inspection and maintenance of electrical installation (other than mines)"
 - GB50257-2014 "Code for construction and acceptance of electric device for explosion atmospheres and fire hazard electrical equipment installation engineering"
 - GB15577-2007/1995 "Safe regulation for explosive dust atmospheres"
 - GB12476.2-2010 "Electrical apparatus for use in the presence of combustible dust - Part 1-2: Electrical apparatus protected by enclosures and surface temperature limitation - Selection, installation and maintenance"

F	≠00	/	17.5	500	5.5	0	0
FISCO							

4. The product should be used with Ex-certified associated apparatus to establish explosion protection system that can be used in explosive gas atmospheres. Wiring and terminals should comply with the instruction manual of the product and associated apparatus.
5. The cable between this product and associated apparatus should be shielded cables (the cables must have insulated shield). The shield has to be grounded reliably in non-hazardous area.
6. The product complies to the requirements for FISCO field devices specified in IEC60079-27:2008. For the connection of an intrinsically safe circuit in accordance FISCO model, FISCO parameters of this product are as above.
7. End users are not permitted to change any components inside, but to settle the problem in conjunction with manufacturer to avoid damage to the product.
8. When installation, use and maintenance of this product, observe the following standards:
 - GB3836.13-2013 "Electrical apparatus for explosive gas atmospheres Part 13: Repair and overhaul for apparatus used in explosive gas atmospheres"
 - GB3836.15-2000 "Electrical apparatus for explosive gas atmospheres Part 15: Electrical installations in hazardous area (other than mines)"
 - GB3836.16-2006 "Electrical apparatus for explosive gas atmospheres Part 16: Inspection and maintenance of electrical installation (other than mines)"
 - GB3836.18-2010 "Intrinsically Safe System"
 - GB50257-20141996 "Code for construction and acceptance of electric device for explosion atmospheres and fire hazard electrical equipment installation engineering"

Rev 2.4

European Directive Information

A copy of the EC Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EC Declaration of Conformity can be found at Emerson.com/Rosemount.

Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification.

Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Installing Equipment in North America

The US National Electrical Code (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

1. Cable entries must be used which maintain the ingress protection of the enclosure to at least IP66.
2. Unused cable entries must be filled with suitable blanking plugs which maintain the ingress protection of the enclosure to at least IP66.
3. Cable entries and blanking plugs must be suitable for the ambient temperature range of the apparatus and capable of withstanding a 7J impact test.
4. The Rosemount 3051S - SuperModule must be securely screwed in place to maintain the ingress protection of the enclosure.

I7 IECEx Intrinsic Safety

Certificate IECEx BAS 08.0025X
Standards IEC 60079-0:2011, IEC 60079-11:2011
Markings Ex ia IIC T4 Ga, T4(-60 °C ≤ T_a ≤ +70 °C)

Parameter	HART	FOUNDATION Fieldbus	SuperModule only	RTD (for 3051SFx)	
				HART	Fieldbus
Voltage U _i	30 V	30 V	7.14 V	30 V	30 V
Current I _i	300 mA	300 mA	300 mA	2.31 mA	18.24 mA
Power P _i	1 W	1.3 W	887 mW	17.32 mW	137 mW
Capacitance C _i	14.8 nF	0	0.11 μF	0	0.8 nF
Inductance L _i	0	0	0	0	1.33 mH

Special Conditions for Safe Use (X):

1. If the equipment is fitted with the optional 90 V transient suppressor, it is incapable of withstanding the 500 V isolation from earth test and this must be taken into account during installation.
2. The enclosure may be made of aluminum alloy and given a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion if located in a Zone 0 environment.

IG IECEx FISCO

Certificate IECEx BAS 08.0025X

N7 IECEx Type n

Certificate	IECEx BAS 08.0026X
Standards	IEC 60079-0:2011, IEC 60079-15:2010
Markings	Ex nA IIC T5 Gc, ($-40\text{ °C} \leq T_a \leq 70\text{ °C}$)

Special Condition for Safe Use (X):

1. If fitted with a 90 V transient suppressor, the equipment is not capable of withstanding the 500 V electrical strength test as defined in Clause 6.5.1 of IEC 60079-15:2010. This must be taken into account during installation.

Brazil**E2 INMETRO Flameproof**

Certificate	UL-BR 15.0393X
Standards	ABNT NBR IEC 60079-0:2008 + Corrigendum 1:2011, ABNT NBR IEC 60079-1:2009 + Corrigendum 1:2011, ABNT NBR IEC 60079-26:2008 + Corrigendum 1: 2008
Markings	Ex db IIC T* Ga/Gb, T6 ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$), T5/T4 ($-60\text{ °C} \leq T_a \leq +80\text{ °C}$), IP66

Special Conditions for Safe Use (X):

1. The device contains a thin wall diaphragm less than 1mm thick that forms a boundary between zone 0 (process connection) and zone 1 (all other parts of the equipment). The model code and datasheet are to be consulted for details of the diaphragm material. Installation, maintenance, and use shall take into account the environmental conditions to which the diaphragm will be subjected. The manufacturer's instructions for maintenance shall be followed in detail to assure safety during its expected lifetime.
2. Flameproof joints are not intended for repair.
3. Non-standard paint options may cause risk from electrostatic discharge. Avoid installations that could cause electrostatic build-up on painted surfaces, and only clean the painted surfaces with a damp cloth. If paint is ordered through a special option code, contact the manufacturer for more information.

I2 INMETRO Intrinsic Safety

Certificate	UL-BR 15.0357X
Standards	ABNT NBR IEC 60079-0:2008 + Addendum 1:2011, ABNT NBR IEC 60079-11:2009
Markings	Ex ia IIC T4 Ga ($-60\text{ °C} \leq T_a \leq +70\text{ °C}$)

Special Conditions for Safe Use (X):

1. If the equipment is fitted with the optional 90V transient suppressor, it is incapable of withstanding the 500V isolation from earth test and this must be taken into account during installation.
2. The enclosure may be made of aluminium alloy and given a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion if located in a Zone 0 environment, areas requiring EPL Ga.

China

E3 China Flameproof and Dust Ignition-proof

Certificate 3051SMV: GYJ14.1039X [Mfg USA, China, Singapore]

3051SFx: GYJ11.1466X [Mfg USA, China, Singapore]

- Standards** 3051SMV: GB3836.1-2010, GB3836.2-2010, GB3836.20-2010
 3051SFx: GB3836.1-2010, GB3836.2-2010, GB3836.20-2010, GB12476.1-2013, GB12476.5-2013
- Markings** 3051SMV: Ex d IIC T6/T5 Ga/Gb
 3051SFx: Ex d IIC T4...T6 Ga/Gb; Ex tD A20 T_A 105 °C; IP66

Special Conditions for Safe Use (X):

1. Symbol “X” is used to denote specific conditions of use: For information on the dimensions of the flameproof joints the manufacturer shall be contacted.
2. The relationship between T code and ambient temperature range for the 3051SMV are as follows:

T code	Ambient temperature range
T6	-50 °C ~ +65 °C
T5	-50 °C ~ +80 °C

The relationship between T code and ambient temperature range for the 3051SFx are as follows:

T code	Ambient temperature range
T6	-60 °C ~ +70 °C
T4/T5	-60 °C ~ +80 °C

3. The earth connection facility in the enclosure should be connected reliably.
4. During installation, use and maintenance of the product in explosive atmosphere, observe the warning “Do not open cover when circuit is alive”. During installation, use, and maintenance in explosive dust atmosphere, observe the warning “Do not open when an explosive dust atmosphere is present”.
5. During installation there should be no mixture harmful to the housing.
6. During installation, use and maintenance in explosive dust atmosphere, product enclosure should be cleaned to avoid dust accumulation, but compressed air should not be used.
7. During installation in a hazardous location, cable glands and blanking plugs certified by state appointed inspection bodies with Ex d IIC Gb or Ex d IIC Gb DIP A20 [flow meters] IP66 type of protection should be used. Redundant cable entries should be blocked with blanking plugs.
8. End users are not permitted to change any components, but to contact the manufacturer to avoid damage to the product.
9. Maintenance should be done when no explosive gas and dust atmosphere is present.
10. During installation, use and maintenance of this product, observe following standards:
 GB3836.13-1997 “Electrical apparatus for explosive gas atmospheres Part 13: Repair and overhaul for apparatus used in explosive gas atmospheres”
 GB3836.15-2000 “Electrical apparatus for explosive gas atmospheres Part 15: Electrical installations in hazardous area (other than mines)”
 GB3836.16-2006 “Electrical apparatus for explosive gas atmospheres Part 16: Inspection and maintenance of electrical installation (other than mines)”
 GB50257-1996 “Code for construction and acceptance of electric device for explosion atmospheres and fire hazard electrical equipment installation engineering”
 GB15577-2007 “Safety regulations for dust explosion prevention and protection”
 GB12476.2-2010 “Electrical apparatus for use in the presence of combustible dust”

I3 China Intrinsic Safety

Certificate	3051SMV: GYJ14.1040X [Mfg USA, China, Singapore] 3051SFx: GYJ16.14 [Mfg USA, China, Singapore]
Standards	3051SMV: GB3836.1-2010, GB3836.4-2010, GB3836.20-2010 3051SFx: GB3836.1/4-2010, GB3836.20-2010, GB12476.1-2000
Markings	3051SMV: Ex ia IIC T4 Ga 3051SFx: Ex ia IIC T4 Ga, Ex tD A20 T _A 105 °C T ₅₀₀ 95 °C; IP66

Special Conditions for Safe Use (X):

1. The enclosure may contain light metal, attention should be taken to avoid ignition hazard due to impact or friction.
2. The apparatus is not capable of withstanding the 500V electrical strength test defined in Clause 6.3.12 of GB3836.4-2010.
3. Ambient temperature range: -60 °C ~ +70 °C
4. Intrinsically safe electric parameters:

Maximum input voltage: U_i (V)	Maximum input current: I_i (mA)	Maximum input power: P_i (W)	Maximum internal parameters:	
			C_i (nF)	L_i (μH)
30	300	1.0	14.8	0

	Maximum output voltage: U_i (V)	Maximum output current: I_i (mA)	Maximum output power: P_i (W)	Maximum external parameters:	
				C_i (nF)	L_i (μH)

Accessories

Rosemount™ Engineering Assistant (EA) software packages

The Rosemount Engineering Assistant software supports flow configuration for the Rosemount 3051SMV. The package is available with or without modem and connecting cables. All configurations are packaged separately. For best performance of the EA software, the following computer hardware and software is recommended:

Note

Engineering Assistant version 6.1 or later requires the use of Microsoft® .NET Framework version 2.0 or later. If .NET version 2.0 is not currently installed, the software will be automatically installed during the Engineering Assistant installation. Microsoft.NET version 2.0 requires an additional 200 MB of disk space.

Minimum system requirements for Engineering Assistant 5.5.1 for the Rosemount 3051SMV FOUNDATION™ Fieldbus with fully compensated mass flow block

- Intel® Core™ Duo, 2.4 GHz
- Operating System: Windows™ 7, 32- or 64-bit
- 600 MB of available hard disk space
- USB port (for use with fieldbus interface)

Minimum system requirements for Engineering Assistant 6 for the Rosemount 3051SMV HART device

- Pentium®-grade Processor: 500 MHz or faster
- Operating System: Microsoft Windows 2000 (32-bit), Windows XP Professional (32-bit), Windows 7, or Windows 8
- 256 MB RAM
- 100 MB of available hard disk space
- RS232 serial port or USB port (for use with HART® modem)
- CD-ROM
