Fusion4 MSC-L

Honeywell Enraf

Intuitive loading control.

Honeywell Enraf's Fusion4 multi stream controller for loading provides custody transfer approved loading control and sophisticated features with the world's most intuitive operator interface. Controlling up to 24 meter streams, its large 8" WVGA full color display and keyboard and icon-driven interface provide intuitive monitoring and control. Driver identification, vehicle data entry, product scheduling, batch recipe details, and transaction control are all simple to set up and review. Quick start up times, calibration wizards, diagnostic dashboards and zero-downtime upgrades keep the operation moving. The scalable, modular design features expandable I/O, and the widest selection of protocol libraries and communication network capabilities for seamless, cost effective integration into your operation.

Global Experience. Locally Applied.

The MSC-L controls up to six loading arms simultaneously for precise, safe and reliable loading and transfer of high value product at road loading, rail, and marine terminals, as well as tank farms. Custody transfer approved and suitable for hazardous areas, it brings Fusion4's unique, intuitive user-experience to the loading operation.

- Road Loading
- Aviation Refuelling
- Storage Transfers
- Marine Bunkering
- Pipeline Transfers
- Transport Bunkering
- Unloading

Uncompromising Control

Smarter Control: the Fusion4 Interface

The MSC-L uses a smart, "app-driven" interface to leverage users' familiarity with smart phones and tablet computer technology. Self-explanatory graphical on-screen icons make it uniquely intuitive to operate, drastically cutting training times and human error.

Users benefit from complete visibility and control of all major functions in the field with little or no training. Tanker drivers can quickly and simply input and control their loading requirements. Real time dynamic displays with status bar guidance and transfer progress status indicators provide at-a-glance monitoring of all loading operations.

Tailored to the Operation

With the world's most advanced multi stream controller users can configure the level of detail displayed to meet operators' requirements and choose from over 15 languages.

FlexFlow – a configurable workflow function – enables users to choose customer-specific operational sequencing for a tailored, smooth user experience that adapts to the operation.

Scalable and Modular

Control for up to 24 meter streams simultaneously helps you do more with less. A modular design allows common building blocks to be added to meet basic or sophisticated operational requirements for a cost effective solution.

In addition, the integrated additive and blend capability allows the free configurability of meter inputs to be assigned as blend streams or additive streams, in either single pulse or dual pulse configuration, as the user sees fit, for the most comprehensive solution in the industry.

Optimized System Connectivity

A wide range of protocol libraries and communication network capabilities and optimized electronic integration allow seamless connectivity with industry standard terminal automation systems, protecting existing investments.

Powerful Alarm Handling

Fusion4's advanced alarm handling monitors nearly twice as many parameters as any other device, while its large color screen clearly annunciates and differentiates all alarm conditions, for a safe, reliable operation. User configurable alarms provide additional flexibility, allowing the operator to quickly select both the alarm conditions and define alarm messaging through the menu structure.

Set up and Maintenance

Starting up in under a minute, the MSC-L features live upgrades, calibration wizards and configurable I/O to assign functions to any input or output for faster installation and set-up. Real-time stream, I/O type and system diagnostics keep the operation running smoothly, while the Fusion4 Portal software helps achieve the highest standards of reliability. Its features include remote monitoring, configuration and printing of all MSC transactions, alarms and communication status via Ethernet or Serial comms.

Full Featured

Full color screen and keyboard:

Intuitive monitoring and control using the Fusion4 interface.

Rapid start-up:

In under a minute with the Calibration Wizard and quick configuration.

Zero-downtime:

Firmware upgrades live in the field with the LAD.

Configurable, expandable I/O: For flexible operations.

Advanced alarm handling:

Monitor nearly twice as many control parameters as any other device.

Real-time diagnostics:

Live stream, I/O type, and system diagnostics.

Multiple language support:

English (US), English (UK), French, German, Spanish, Dutch, Chinese (simplified), Japanese, Polish, Italian, Portuguese, Swedish, Thai, Russian, Arabic, Brazilian Portuguese and Turkish.

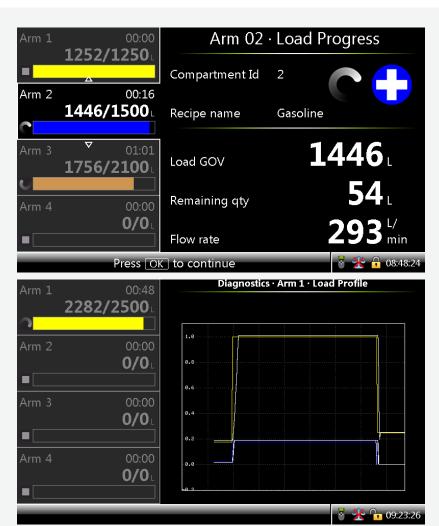

Secure

- Multi level security access
- External, sealable weights & measures switch
- Separate enclosure security seal
- Onboard Event recording
- On screen W&M compliance icon
- On screen device locked icon (system menu)
- Downloadable proving record

Connect

- 7 Serial Ports
- 3 Ethernet Ports
- Hazardous area LAD local access device – service tooling
- MiniPak IR Controller backward compatibility
- Fusion4 Portal remote printing, monitoring, configuring and diagnostics software
- Terminal Manager TAS integration
- RIT Panel interfacing

UX

- 8" Super WVGA color LCD screen, 16:9 aspect ratio.
- Auto brightness Ambient light sensor
- Onboard user selectable language library
 English (US), English (UK), French, German, Spanish, Dutch, Chinese (simplified), Japanese, Polish, Italian, Portuguese, Swedish, Thai, Russian, Arabic, Brazilian Portuguese and Turkish
- Onboard petrochemical product icon library (EU, US)
- Configurable progress bar product colors
- Configurable progress screen dynamic data elements
- On screen user prompting

Maintain

- Dual redundancy power supplies
- Real time, on screen load profile graphs
- Simulated DCV mode
- Diagnostic Dashboard
- Serial & Ethernet diagnostics
- I/O switch count
- Service due reminder

Install

- Base and rear mountable
- Single plane wiring area
- High/low voltage separation
- Color coded terminal connectors
- Easy-pull tabbed terminal connectors
- Integrated termination floor plan inside enclosure
- Anti cross-over board connectors
- Metric and Imperial gland arrangements
- Captured cover bolts
- Lifting eyes

Configure

- Configure remotely from Fusion4 Portal
- Configure in the field with LAD upload
- Free form User defined IO functions
- Configurable batch set up workflow
- Programmable alarms

Loading Configurations

Straight Product Loading

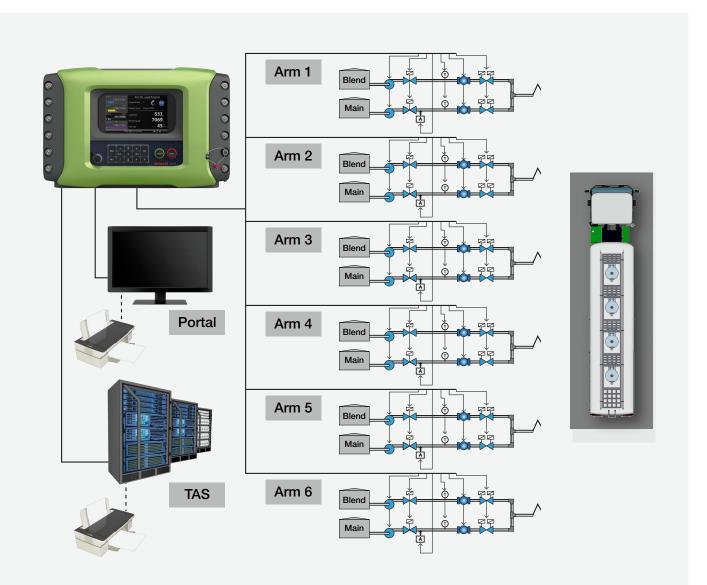

- 1 to 6 arms simultaneous

Ratio & Side Stream Blending

 In addition to load arm assignments -Up to 18 blend streams assigned per device. Up to 6 blend streams assigned per arm. Up to 3 blend streams used simultaneously per batch.

Additive Injection

 In addition to load arm assignments – Up to 36 internally controlled additive injectors assigned per device. Up to 12 internally controlled additive injectors assigned per arm. Up to 6 internally controlled additive injectors used simultaneously per batch.

Typical MSC-XL6 arrangement

- 6 dual pulse load arms with temp comp
- 6 single pulse blend streams with temp comp
- 6 additive injectors

Nine licenses available

- 3 standard (L) licenses (1 to 3 load arms)
- 6 enhansed (XL) licenses (1 to 6 load arms)

Each license permits the configuration of the appropriate number of load arms, plus, the user defined configuration of remaining SPI's as blend or additive streams, as required.
