Your Assurance of Quality and Service

## Model FLS Flood Level Switch Descriptive Data

Figure 1

## DESCRIPTION

The Model FLS, part number 53-4701-001, is a float operated, liquid level control designed for bracket mounting in floor level sumps or troughs. The proven Magnetrol magnetic coupling is employed to transmit float movement to a single snap-action dry contact switch mechanism. The switch is factory set for $3 / 4$ " level differential for off-on control-alarm and/or safety shutdown service.

## APPLICATIONS

The Model FLS is used to detect leaks or spills from critical valves, vessels, and pipelines in power plant installations, as shown in Figure 1.

## CONSTRUCTION

Simple and rugged in design, the Model FLS is constructed of quality materials throughout to assure reliable operation and a long trouble-free service life.

## FLOAT ENVELOPE

A perforated stainless steel float envelope is welded to a forged steel bracket assembly totally enclosing the float and providing a side mounting surface. A stainless steel bottom strap, tack welded to the float envelope, acts as a low level float stop.

## FLOAT AND TRIM

300 series stainless steel float with a 400 series magnetic attraction sleeve. Internal trim is 300 series stainless steel.

## SERIES B SWITCH MECHANISM

The Magnetrol Series B switch mechanism with SPDT contacts is rated:

| Voltage | Non-Inductive Ampere Rating <br> Series B Switch Mechanism |
| ---: | :---: |
| 120 VAC | 15.00 |
| 240 VAC | 15.00 |
| 24 VDC | 6.00 |
| 120 VDC | 0.50 |
| 240 VDC | 0.25 |

$+250^{\circ} \mathrm{F}$ maximum ambient temperature

## SWITCH HOUSING

A NEMA 4X,6,7/9 cast aluminum submersible electrical enclosure is standard, and allows $180^{\circ}$ positioning of the conduit outlet for wiring convenience.

## AVAILABLE OPTION

Qualified to IEEE 323-1974, and IEEE 344-1975.

## DIMENSIONAL SPECIFICATIONS inches (mm)
